CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airportsclosed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.

SPECIAL NOTICE

DISCONTINUANCE OF 3117.5 KC DEFERRED: The discontinuance of 3117.5 kc receiving watch by Airway Communications Stations has been deferred to July 1, 1950.

DIRECTORY OF AIRPORTS	Pages 1 through 55
RADIO FACILITY DATA	Pages IV through XIX
NOTICES TO AIRMEN	Pages 56 through 76

VOL. 5, NO. 1.....MARCH 28, 1950

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult teletype NOTAMS.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO PILOTS AT CIVIL AND MILITARY AIRPORTS IN ACCORDANCE WITH THE FOLLOWING:

CAA GCA UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest GCA.

AIR FORCE GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective AFB.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call nearest air traffic control facility requesting GCA and further instructions.

Contact under VFR: VFR check-out training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, Air Force towers may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at pilot's discretion.

No AF unit can transmit directly on tower low frequency. In addition to frequencies listed below, Air Force GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NAVY GCA UNITS- Available to civil pilots in emergency or by prior arrangement with C.O. of respective NAS or MCAS.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility or associated station control tower.

Contact under VFR: VFR check-out training flights by prior arrangement with the C.O. of respective station.

Most Navy GCA units can transmit instructions on tower low frequency. In addition to frequencies listed below, Navy GCA emergency transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NOTE: Air Force and Navy GCA units require twenty (20) to thirty (30) minutes for warming up outside of scheduled hours of operation. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

LEGEND

G/T = Guards all frequencies on which station transmits. "G/T except 3295" indicates # transmitting frequency 3295 kc not guarded.
HF = 3475,4890,6640 kc.
* = Guards all VHF frequencies station transmits.
(E) = Emergency use, as 121.5 (E).
** = Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.
• = Air Force guard 4495,4765,3117.5 kc and 121.5 mc.
(3) = 3105,4495,3117.5 kc, 122.1,126.7,140.58 mc.
D = Day (N) = Night.
→ = New or revised data.

(A) = Air Force Facility. G.P. = Glide Path. L7=Hi-intensity approach lgts. (W) = Without voice. (&) = On test basis, unmonitored and not to be used for navigation. MMK's. < OMK's are at the same locations as the middle and outer markers unless otherwise specified. → New or revised data. + =additional data will be found in Notices To Airmen section

AIR NAVIGATION RADIO AIDS

VHF OMNI-RANGES. "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly. NOTE: Only those courses cited in Notam section have been flight-checked and found usable for 50 miles unless otherwise cited. Other radials not approved for instrument use.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE. Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere, (Y) = Yellow hemisphere
➔ = New or revised data
✓ = New facilities or name changes, see page XIX
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . .Approach Control Tower, CAA
B. . . . .Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . .Control Tower, CAA
CA. . . .Control Tower, Air Force
CI . . . .Control Tower (City, County, Private, etc.)
CN. . . .Control Tower, Navy
D. . . . .Distantly controlled
FM. . . .VHF fan marker (100 watts)
GCA. . .Ground Controlled approach system
H. . . . .Non-directional radio beacon (homing), power 50 watts or more
ILS. . . .Instrument Landing System (voice on localizer channel)
IM . . . .VHF boundary marker
L. . . . .L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . .VHF fan marker, low powered (5 watts, not over 10 miles from range)
MH. . . .Non-directional radio beacon (homing) power less than 50 watts
ML. . . .Range (loop radiators), power less than 50 watts
MM. . . VHF middle marker
MMK. . Compass locator station when combined with middle marker of ILS
MOR . . Low frequency omni-directional range
MRA . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts.
MRL . . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . .VHF outer marker
OMK. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P. . . . .Point-to-Point radio
RA. . . .Range (adcock, vertical radiators), power 150 watts or more
RL. . . .Range (loop radiators), power 150 watts or more
S. . . . .Simultaneous (range signals and voice) type of transmitter
T. . . . .Teletype
TX. . . .Principal teletype
V. . . . .Additional VHF voice feature on other than range frequency
VAR. . .Visual-aural VHF range
VOR. . .Visual omni-directional VHF range
W. . . . .Without voice facilities
Z. . . . .VHF station location marker at a range station

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105,4495,3117.5 kc, 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495,3117.5 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-3117.5,122.1 = guards every frequency in group (3) except 3117.5 and 122.1
(3),6210-3117.5 = guards 6210 plus every frequency in group (3) except 3117.5

NOTES

1. The new two-way international emergency frequency, 121.5 mc, has been commissioned at many towers and communication stations. All C.A.A. towers and communication stations will be using this frequency by approximately September 1, 1950.
2. All CAA Control towers stand continuous watch on 3117.5 kc, airline frequency. CAA INSACS, however, will discontinue watch on 3117.5 kc sometime after April 1, 1950. INSAC with associated tower does not guard 3117.5 kc except when tower inoperative.
3. Range courses are magnetic in-bearings.
4. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
5. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
6. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the channel or frequency on which the station reply is expected.

DIRECTORY OF AIRPORTS
LEGEND

CITY AND AIRPORT NAME

(A) AIRPORT NAME (WITH A IN TYPE COLUMN) - FIELD OWNED OR LEASED IN WHOLE BY U. S. AIR FORCE. AS SUCH, FIELD IS OPEN TO CIVIL ACFT ONLY BY PRIOR PERMISSION OF C. O. THEREOF.

NOTE: SIMILAR COMBINATIONS OF N, CG, AND NG INDICATE THE SAME IS APPLICABLE FOR NAVY, COAST GUARD, AND NATIONAL GUARD FIELDS, RESPECTIVELY.

(A) City and Airport Name (with C,I,M,MG, or P in Type column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and Air Force which permits use by transient military aircraft.

★ City and Airport Name - C.A.A. Int. Field, open to mil acft. "★Effingham, 10, STL-IND," for example, indicates that the airport is Effingham C.A.A. Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.

NOTES:

1. Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.
2. Military aircraft are permitted to use any field prefixed with an (A), (N), (CG), (NG), (P), or ★ .
3. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A", "N", "NG", or "CG" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.
4. When city and airport names are identical, the airport name is omitted in the interest of space-conservation.

TYPE

A	-U.S. Air Force	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
CG	-Coast Guard	MG	-Misc. Govt.	P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NO. OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY
FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
Omission of B indicates beacon is not available.

NOTE: Code beacons are not codified, and are carried in Remarks Column.

L: Field Lighting

L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Strip lights or portable runway lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway
5 - Instrument approach
6 - High intensity runway
7 - High intensity instrument approach

✱ An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:
F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

FUEL OCTANE (cont)

Army and Navy Fuel:
A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP-1

REMARKS

(a) "CLOSED" indicates closed to all transient aircraft except on official business with written orders this station or in emergency "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.

(b) "INACT-NO FACS." indicates USAF and/or Navy airfields which are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the Organization to which the aircraft is assigned.

(c) "CIVIL SVCG ONLY" indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.

(d) "STATUS UNKNOWN" indicates former Air Force and Navy fields are in the process of being disposed of by the Liquidation Service of General Services Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

(e) "ABANDONED" indicates reverted to non-airport usage, such as farming or grazing.

(f) "FEE" indicates landing charges for private or non-revenue producing aircraft Very few airports charge landing fee for private aircraft. A number of fields, however, have parking fees for planes that remain over a couple of hours and which buy no services Most of the major airports such as airline terminals have landing fees for all revenue producing aircraft. Unfortunately, we cannot indicate these in the guide

(g) "+" indicates additional data will be found in Notices to Airmen Section

(h) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(i) "Rgt tfc N" indicates right turns should be made on landings and take-offs to the N.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least a 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Fairfield-Suisun AFB, Calif., or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Tex.; Brookley AFB, Ala.; Washington National Airport, D.C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; MacDill AFB, Fla.; Washington National Airport, D.C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Airport, D.C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

LISTING OF LOCATION OF PLAN 62 INTERPHONE FACILITIES: The location of each Plan 62 interphone connection to Flight Service is indicated in the Directory of Airports section of A.N 08-15-1. When closing or filing flight plans with Flight Service, pilots should check availability of interphone before placing long distance phone calls.

CHANGE IN VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy, and Coast Guard:

AIR FORCE*	NAVY	COAST GUARD	SERVICE
A...140.58			CAA Airways (Range Station)
	1-A...121.5	1...121.5	Military Emergency

U...108.3			ILS localizers and VAR ranges
V...108.7			"
W...109.1			"
X...109.5			"
Y...109.9			"
Z...110.3			"

(a) Available for service indicated on secondary basis.

* Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

** 137.88 authorized as interim frequency pending receipt of crystals. In 4-channel set-ups 126.18 and 142.02 mc may be substituted in accordance with operational requirements.

PORTABLE TRAFFIC CONTROL LIGHT SIGNALS: The attention of Air Force personnel is directed to CAA's Flight Information Manual, Volume 4, Number 1, dated August 1,1949, subject, "Portable Traffic Control Light Signals". Procedure listed is to be incorporated in "ANC Procedures for the Control of Air Traffic", and in the interim, Air Force personnel will comply with listed procedures.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see

✓ Indicates new or revised Special Notices

pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aids and communication services, particularly when standard low frequency facilities are not available.

ADVISORY REGARDING GCA MINIMUMS DURING APPROACH: USAF Regulations require all USAF GCA final controllers to advise aircraft when they are passing through the published GCA minimum established for specific base. This advisory is intended for a sole purpose of re-emphasizing the pilot's responsibility with regard to field minimums.

APPROVAL OF INSTRUMENT APPROACH PROCEDURES FOR AIRPORTS LOCATED IN EXCESS OF SEVEN MILES FROM THE RANGE STATION: In accordance with minutes of Airspace Subcommittee Meeting No. 131, instrument approach procedures may now be approved for airports located in excess of seven miles from the associated radio facility, but such procedures will be governed by the following criteria:

a. From 7 to 10 miles, visibility not less than 2 miles and ceiling not less than 500'.

b. From 10 to 12 miles, visibility not less than 2 miles and ceiling not less than 700'.

c. Twelve miles or over, operations shall be conducted in accordance with visual flight rules from radio range facility. Air Force procedures utilizing contact courses have recently been disapproved. If cancellation affects operation, new procedure should be submitted in accordance with AF Letter 55-6 and above criteria.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U.S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949"

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following are those which are now effective and distributed under AF Regulation 5-12. Base operations officers, weather and communication units, should check copies in use to insure that latest issues and all revisions are available. No manuals other than the following should be requested at this time under paragraph 5, AF Regulation 5-12.

GROUP I MATERIAL: II-B-2, Movement and Control Messages, July 1, 1948; II-B-3, Notices to Airmen, First Edition May 1, 1949 with one revision; Contractions, Fourth Edition, Dec.1, 1949; Location Identifiers, Third Edition, Sept. 15, 1948, with 17 supplements.

GROUP II MATERIAL: II-B-5, Airways Air-Ground Communications, Second Edition, Sept.1, 1948, with two revisions.

GROUP III MATERIAL: II-B-7, Landline Operating Procedures, April 15, 1945.

GROUP IV MATERIAL: Civil Airways Mileage Chart of July 27, 1949.

GROUP V MATERIAL: Service "A" Manual, Feb. 21, 1950 with four revisions; Service "C" Manual Jan. 24, 1950; Teletype Maps: M-10, Jan. 1, 1949; M-11, Dec. 1, 1949; M-13, June 15, 1948; and M-14, July 1, 1948.

GROUP VI MATERIAL: Teletype Maps: Drawing M-58, April 1, 1949; Drawing M-59, Jan. 5, 1949.

✓ CORRECTIONS AND AMENDMENTS TO AN 08-15-1: AND FOREIGN RADIO FACILITY CHARTS: Correct the call signs at the following Alaskan Military Airways Stations carried in Airman's Guide Vol. 4, No. 25: (1) Amchitka , AKD-7

(2) Atka, AKD-6

(3) Cape AFB, AKD-4

(4) Eilson AFB, AKC-7

(5) Skullcliff, AKC-4

CHANGES FOR TO 08-15-3: (1) Springfield, Il. (Capital Airport). Change name of Springfield Arpt east of range to Southwest Arpt.

(2) Sewart AFB, Tenn. Change ident of radio range to SYM.

(3) Blytheville, Ark. Show range as decommissioned.

(4) Bismarck, N. D. Missed approach procedure: Climb to 3300' on W crs to Judson FM. Change remarks to read: Radio tower 2413' MSL 4 mi. N and 8 mi. E of range.

(5) Cincinnati, Ohio. Delete Min Alt from NW of 2200' (Cedar Grove FM).

(6) Columbus, Ohio. (Procdr No. 1) Show name of field as Port Columbus. Change approach altitudes from NE to the following: 2600' (Int W Crs CLE); 2500' (Mansfield "H"); 2300' (Mt. Liberty FM).

Columbus, Ohio. (Procdr No. 2) Show name of field as Port Columbus. Change approach altitudes from NE to the following: 2600' (Int W Crs CLE); 2500' (Mansfield "H"); 2300' (Mt. Liberty FM).

(7) Dickinson, N. D. Low Cone: 3260'. Complete procedure turn within 10 mi. - 3800', within 15, 20 or 25 mi. - 4000'. Ceiling over field: *600'. *500' for aircraft with stall speeds 75 mph or less.

(8) Louisville, Ky. Change Initial Approach alt from E to 2400' (N crs Lexington VAR). Complete procedure turn within 10 mi. - 1900'; within 15, 20, or 25 mi. - 2400'. Show ceiling as *600'. *500' for aircraft with stall speeds 75 mph or less.

(9) Madison, Wis. Change min en route alt from NW to 3300' (Int N crs Lone Rock). Missed approach procedure: Climb to 3300' on NW crs. Complete procedure turn within 10, 15, 20 or 25 mi. - 2100'.

(10) Pembina, N. D. Missed approach procedure: Climb to 2000' on N crs.

(11) South Bend, Ind. Procedure turn: N side W crs.

(12) Winslow, Ariz. Change initial approach from E to 10,000' (ZUN range stn) Ceiling over field: *600'. *Acft with stall speeds 75 mph or less, 500'.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydorgraphic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

MANDATORY GUARD ON 3105 KC DISCONTINUED: Mandatory guard on 3105 kc at Naval and Marine Air-ground communications installations are being discontinued. (3-28-50)

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand advice covering permanent airport data changes, such as a new airport, or a lenghened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, CAA, Washington 25, D. C.).

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide. District Airport Engineer addresses are listed in the Notices to Airmen section.

AIRPORT TOWER CALL-UPS: Itinerant pilots with L. F. receivers should bear in mind that Airport Traffic Control Towers transmit on low frequencies other than 278 kcs. Check the latest issue of the Airman's Guide or call by radio to the nearest INSAC for the correct Tower frequency and avoid confusion.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions) carried in the Notice to Airmen section are facility coordinates, post deadline data, airports closed because of construction, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

AIRPORTS NOT TYPED AS "A" or "N" OPEN TO CIVIL AIRCRAFT: Air Force aircraft are restricted to their own fields, CAA intermediate fields, and to those civil airports prefixed by an (A), (N), (NG), or (P) in the Directory of Airports section.

Civil Airports prefixed by (A) or (NG) have an Air Force or National Guard servicing detachment, or lease, thereon. Those prefixed by (N) have a Navy (Air) servicing detachment, or lease, thereon. Those prefixed by (P) have no such servicing detachments but are open to Air Force, Navy, Army, Coast Guard aircraft.

Note: Unless an airport carries an "A" or an "N" in the type column, it is open to civil aircraft. All airports with no prefixes are exclusively civil fields.

CIVIL USAGE OF MILITARY GCA UNITS: Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the commanding officer of the fields having such units. CAA -established civil ceiling and visibility minimums of 400 feet and 1 mile respectively are mandatory, except in emergency.

NEW YORK-CHICAGO VOR AIRWAY: This airway operates on an experimental basis. Aircraft equipped to use VOR facilities may be cleared to conduct flight on the New York-Chicago VOR airway.

Standard operating procedures for VHF omniranges (VOR) during the transition period when both VOR and low-medium frequency ranges are in use have been developed. These procedures contain the phraseologies which will be used by air traffic controllers in clearing flights to operate via the VOR facilities. A chart of the New York-Chicago VOR airway has been prepared by the Coast and Geodetic Survey. Copies of the procedures and the chart may be obtained from either the New York or the Chicago CAA Regional Office.

✓ CAA AIRWAY COMMUNICATIONS STATIONS GUARDING 126.7 MC: Receiving watch on 3117.5 kc, airline frequency, will be discontinued by all CAA airway communications stations shortly after July 1, 1950. A continuous receiving watch on 126.7 mc, airline en route frequency is nowstood by all CAA airway communications stations. Many stations are already using this as a transmitting frequency also.

✓ WATCH OUT FOR THOSE SPRING THAWS: Remember that a muddy field can tip your nose and break your props or even put you over on your back. Many sod and bare strips are dangerously soft in the spring thaws - stick to paved runways where available.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: (1) Correct C. & G.S. Rdo Fac Chart #46, dated Jan 11, 1950, by changing Douglas (Bisbee-Douglas International) BVOR, bearing and distance from 311°, 4.6 mi to 118°, 4.7 mi.

(2) Correct C. & G.S. Rdo Fac Chart #1, dated Feb. 15, 1950 by changing Seattle, Seattle-Tacoma, Class to SBRAZ-DTXPV. (3) Cgt. C. & G.S. Rdo Fac Chart, dtd Feb. 7,1950 by changing the Little Rock.,Ark freq to read 113.9 mc.

✓ ARTC BOUNDARY AMENDMENTS: Effective 0001 EST April 4, 1950, ARTC Boundaries will be established as follows: St. Louis-Ft. Worth on Red 11, 65 mi SW of Tulsa, Okla. Albuquerque ARTC Boundary will be extended to include, Red 88- from the Albuquerque, N. Mex., rng to a point 25 mi SE of the Roswell, N. Mex., rng, Red 4- from the Otto, N. Mex., rng to the intsxn of the S crs of Otto, N. Mex., rng and Red 88, Red 71 -from Lubbock, Tex., rng to a point 30 mi SW of Roswell, N. Mex., rng. The Albuquerque Flight Advisory Area will remain unchanged.

✓ ON-REQUEST REPORTING POINT: Effective May 1, 1950 the following on-request reporting point will be established: Weatogue - the intsxn of the S crs Westfield, Mass., and the NW crs of Hartford, Conn.

✓ NON-STANDARD HOLDING PATTERN: Effective immediately the following non-standard holding pattern is established: Holding point - Lubbock Tex., ILS outer marker, direction from holding point - North. Direction of turn - left on E side of N crs of localizer. Time - 2 minutes.

(2) Effective immediately the following non-standard holding patterns are deleted: (a) Fargo ILS OMK. (b) Minneapolis (Wold-Chamberlain) ILS OMK.

✓ DANGER AREA DESIGNATIONS: The following Danger Area amendments will be effective as dated unless otherwise advised.

AMENDMENT NO. 30 (April 1, 1950)

(1) The San Miguel, California, area is amended by changing the Name and Location (Chart) column to read: San Miguel Island, Offshore California (San Francisco Chart).

(2) A Haven, Wisconsin, area is added to read: Location: Haven (Milwaukee Chart) Description: Beginning at lat. 43-52-30N, long. 87-44-00W; NE to lat. 44-01-00N, long. 87-28-00W; SE to lat. 43-57-00N,long. 87-24-00W; due S to lat. 43-46-30N; SW to lat 43-42-15N, long. 87-27-40W; WNW to lat. 43-44-00N, long. 87-34-00W; NW to lat 43-51-00N, long. 87-44-

(3-28-50)

00W; due N to lat. 43-52-30N, long. 87-44-00W, point of beginning. Altitudes: Surface to 85,000'. Time: 0600 to 2000, daily, except Saturdays and Sundays, April 1, 1950 thru Oct. 30, 1950. Using Agency: Hdq., 5th Army, Chicago, Ill.

AMENDMENT NO. 31 (April 15, 1950)

(a) A Water Island (St. Thomas), Virgin Islands, area is added to read: Location: Water Island (St. Thomas) (WAC 649). Description: Beginning at lat. 18-20-08.5N, long. 64-57-55W; NE to lat. 18-20-13.5N, long. 64-57-22W; SE to lat. 18-19-36N, long. 64-56-46W; SE to lat. 18-19-08N, long. 64-56-25W; SW to lat. 18-18-26N, long. 64-57-15W; due W to long. 64-57-45W; NW to lat. 18-19-20N, long. 64-58-00W; NNE to lat. 18-20-08.5N, long. 64-57-55W, point of beginning. Altitudes: Surface to 10,000'. Time: Continuous. Using Agency: Dept. of Army Chemical Corps.

(b) A West End (St. Thomas), Virgin Islands, area is added to read: Location: West End (St. Thomas) (WAC 649). Description: Beginning at lat. 19-22-15N, long. 65-02-32W; due E to long. 64-59-47W; S to lat. 18-21-48N, long. 64-59-46W; SW to lat. 18-21-37.5N, long. 64-59-52W; ENE to lat. 18-21-39N, long. 64-59-44W; SSE to lat. 18-21-11N, long. 64-59-36W; S to lat. 18-20-35N, long. 64-59-33W; due W to long. 65-02-32W; due N to lat. 18-22-15N, long. 65-02-32W, point of beginning. Altitudes: Surface to 10,000'. Time: Continuous. Using Agency: Dept. of Army Chemical Corps - San Jose Project.

✓ CORRECTIONS AND AMENDMENTS FOR FLIGHT INFORMATION MANUAL VOL. 4, NO. 2: Correct Chapter pages to read as follows:

DANGER AREAS:

162, under China Lake, Calif. - Description: Beginning at lat 36-14N, long. 117-53W, due E to long. 117-25W; due S to lat 35-40-30N, WSW to lat 35-37-30N, due W to long. 117-47-30W, NNW to lat. 35-54N, long. 117-53W; due N to lat 36-14N, long. 117-53W, point of beginning Using Agency: 12th Naval Dist San Francisco, Calif

162, under Carrizzo Valley, Calif - Using Agency: 11th Naval Dist., San Diego, Calif

165, add: Lakeland, Ga. (Jacksonville Chart) Description: A circular area having a radius of 1 mile, centered at lat 30-58-50N, long. 83-08-30W Altitudes. Surface to 10,000' Time: Continuous. Using Agency: 14th Air Force.

AIRPORT NAME INDEX:

54, Crossville, Tenn., second column, lat. 35-57-30.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO PILOTS AT CIVIL AND MILITARY AIRPORTS IN ACCORDANCE WITH THE FOLLOWING:

CAA GCA UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest GCA.

AIR FORCE GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective AFB.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call nearest air traffic control facility requesting GCA and further instructions.

Contact under VFR: VFR check-out training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, Air Force towers may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at pilot's discretion.

No AF unit can transmit directly on tower low frequency. In addition to frequencies listed below, Air Force GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NAVY GCA UNITS- Available to civil pilots in emergency or by prior arrangement with C.O. of respective NAS or MCAS.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility or associated station control tower.

Contact under VFR: VFR check-out training flights by prior arrangement with the C.O. of respective station.

Most Navy GCA units can transmit instructions on tower low frequency. In addition to frequencies listed below, Navy GCA emergency transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NOTE: Air Force and Navy GCA units require twenty (20) to thirty (30) minutes for warming up outside of scheduled hours of operation. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

LEGEND

G/T = Guards all frequencies on which station transmits. "G/T except 3295" indicates transmitting frequency 3295 kc not guarded.
HF = 3475,4890,6640 kc.
# = Guards all VHF frequencies station transmits.
(E) = Emergency use, as 121.5 (E).
** = Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.
* = Air Force guard 4495,4765,3117.5 kc and 121.5 mc.
(D) = Day. (N) = Night.
→ = New or revised data.

(A)=Air Force facility. GP=Glide Path. L7=Hi-intensity approach lgts. (W)=Without voice. (&)=On test basis, unmonitored and not to be used for navigation. MMK's, OMK's are at the same locations as the middle and outer markers unless otherwise specified. ➔New or revised data. + =additional data will be found in Notices to Airmen section. *Continuous dots. (EC-8)=Lclzr back course non-standard and usable only to 8 mi. (BC-unusable)=Back course unusable.

(4-11-50)

AIR NAVIGATION RADIO AIDS

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly. NOTE: Only those courses cited in Notam section have been flight-checked and found usable for 50 miles unless otherwise cited. Other radials not approved for instrument use.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
V = New facilities or name changes, see page XIX
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . .Approach Control Tower, CAA
B. . . .Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . .Control Tower, CAA
CA. . . .Control Tower, Air Force
CI . . . .Control Tower (City, County, Private, etc.)
CN. . . .Control Tower, Navy
D. . . .Distantly controlled
FM. . . .VHF fan marker (100 watts)
GCA. . .Ground Controlled approach system
H. . . .Non-directional radio beacon (homing), power 50 watts or more
ILS. . . .Instrument Landing System (voice on localizer channel)
IM. . . .VHF boundary marker
L. . . .L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . .VHF fan marker, low powered (5 watts, not over 10 miles from range)
MH. . . .Non-directional radio beacon (homing) power less than 50 watts
ML. . . .Range (loop radiators), power less than 50 watts
MM. . . VHF middle marker
MMK. . Compass locator station when combined with middle marker of ILS
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . .VHF outer marker
OMK. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P. . . .Point-to-Point radio
RA. . . .Range (adcock, vertical radiators), power 150 watts or more
RL. . . .Range (loop radiators), power 150 watts or more
S. . . .Simultaneous (range signals and voice) type of transmitter
T. . . .Teletype
TX. . . .Principal teletype
V. . . .Additional VHF voice feature on other than range frequency
VAR. . .Visual-aural VHF range
VOR. . .Visual omni-directional VHF range
W. . . .Without voice facilities
Z. . . .VHF station location marker at a range station

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105.4495 kc guarded
(2) = 3105.4495.3117.5 kc, 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495.3117.5 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-3117.5,122.1 = guards every frequency in group (3) except 3117.5 and 122.1
(3),6210-3117.5 = guards 6210 plus every frequency in group (3) except 3117.5

NOTES

1. The new two-way international emergency frequency, 121.5 mc, has been commissioned at many towers and communication stations. All C.A.A. towers and communication stations will be using this frequency by approximately September 1, 1950.
2. All CAA Control towers stand continuous watch on 3117.5 kc, airline frequency. CAA INSACS, however, will discontinue watch on 3117.5 kc sometime after April 1, 1950. INSAC with associated tower does not guard 3117.5 kc except when tower inoperative.
3. Range courses are magnetic in-bearings.
4. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
5. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
6. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the channel or frequency on which the station reply is expected.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(A) AIRPORT NAME (WITH A IN TYPE COLUMN) - FIELD OWNED OR LEASED IN WHOLE BY U. S. AIR FORCE. AS SUCH, FIELD IS OPEN TO CIVIL ACFT ONLY BY PRIOR PERMISSION OF C. O. THEREOF.

NOTE: SIMILAR COMBINATIONS OF N, CG, AND NG INDICATE THE SAME IS APPLICABLE FOR NAVY, COAST GUARD, AND NATIONAL GUARD FIELDS, RESPECTIVELY.

(A) City and Airport Name (with C,I,M,MG, or P in Type column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and Air Force which permits use by transient military aircraft.

★ City and Airport Name - C.A.A. Int. Field, open to mil acft. "★Effingham, 10, STL-IND," for example, indicates that the airport is Effingham C.A.A. Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.

NOTES:

1. Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

2. Military aircraft are permitted to use any field prefixed with an (A), (N), (CG), (NG), (P), or ★ .

3. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A", "N", "NG", or "CG" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

4. When city and airport names are identical, the airport name is omitted in the interest of space-conservation.

TYPE

A	-U.S. Air Force	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
CG	-Coast Guard	MG	-Misc. Govt.	P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NO. OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Strip lights or portable runway lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Low intensity runway
5 - Low intensity instrument approach (neon)
6 - High intensity runway
7 - High intensity instrument approach

★ An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:
F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+:	115/145 oct.	C :	73/80 oct.
A :	100/130 oct.	J :	JP-1
B :	91/98 oct.		

REMARKS

(a) "CLOSED" indicates closed to all transient aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.

(b) "INACT-NO FACS." indicates USAF and/or Navy airfields which are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the Organization to which the aircraft is assigned.

(c) "CIVIL SVCG ONLY" indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.

(d) "STATUS UNKNOWN" indicates former Air Force and Navy fields are in the process of being disposed of by the Liquidation Service of General Services Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

(e) "ABANDONED" indicates reverted to non-airport usage, such as farming or grazing.

(f) "FEE" indicates landing charges for private or non-revenue producing aircraft. Very few airports charge landing fee for private aircraft. A number of fields, however, have parking fees for planes that remain over a couple of hours and which buy no services. Most of the major airports such as airline terminals have landing fees for all revenue producing aircraft. Unfortunately, we cannot indicate these in the guide.

(g) "+" indicates additional data will be found in Notices to Airmen Section.

(h) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(i) "Rgt tfc N" indicates right turns should be made on landings and take-offs to the N.

(j) A,B-Air Force or Navy Fuel See Fuel Octane above.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least a 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Fairfield-Suisun AFB, Calif., or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Tex.; Brookley AFB, Ala.; Washington National Airport, D.C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; MacDill AFB, Fla.; Washington National Airport, D.C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Airport, D.C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

LISTING OF LOCATION OF PLAN 62 INTERPHONE FACILITIES: The location of each Plan 62 interphone connection to Flight Service is indicated in the Directory of Airports section of A.N 08-15-1. When closing or filing flight plans with Flight Service, pilots should check availability of interphone before placing long distance phone calls.

CHANGE IN VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy, and Coast Guard:

AIR FORCE*	NAVY	COAST GUARD	SERVICE
A...140.58			CAA Airways (Range Station)
	1-A...121.5	1...121.5	Military Emergency
B...126.18	2-B...142.74	2...142.74	Control Towers
C...137.88	**3-C...132.3	3...132.3	Military Airways (a) USAF Alternate Control Towers
D...121.5			Two-way International Emergency Frequency
	Guard D...140.58	Guard D...140.58	CAA Airways (Range Station)

	8...134.64	8...134.1	GCA
	9...126.18	9...126.18	Control Towers
U...108.3			ILS localizers and VAR ranges
V...108.7			"
W...109.1			"
X...109.5			"
Y...109.9			"
Z...110.3			"

(a) Available for service indicated on secondary basis.

* Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

** 137.88 authorized as interim frequency pending receipt of crystals. In 4-channel set-ups 126.18 and 142.02 mc may be substituted in accordance with operational requirements.

PORTABLE TRAFFIC CONTROL LIGHT SIGNALS: The attention of Air Force personnel is directed to CAA's Flight Information Manual, Volume 4, Number 1, dated August 1,1949, subject, "Portable Traffic Control Light Signals". Procedure listed is to be incorporated in "ANC Procedures for the Control of Air Traffic", and in the interim, Air Force personnel will comply with listed procedures.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see

✓ Indicates new or revised Special Notices

pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aids and communication services, particularly when standard low frequency facilities are not available.

ADVISORY REGARDING GCA MINIMUMS DURING APPROACH: USAF Regulations require all USAF GCA final controllers to advise aircraft when they are passing through the published GCA minimum established for specific base. This advisory is intended for a sole purpose of re-emphasizing the pilot's responsibility with regard to field minimums.

APPROVAL OF INSTRUMENT APPROACH PROCEDURES FOR AIRPORTS LOCATED IN EXCESS OF SEVEN MILES FROM THE RANGE STATION: In accordance with minutes of Airspace Subcommittee Meeting No. 131, instrument approach procedures may now be approved for airports located in excess of seven miles from the associated radio facility, but such procedures will be governed by the following criteria:

a. From 7 to 10 miles, visibility not less than 2 miles and ceiling not less than 500'.

b. From 10 to 12 miles, visibility not less than 2 miles and ceiling not less than 700'.

c. Twelve miles or over, operations shall be conducted in accordance with visual flight rules from radio range facility. Air Force procedures utilizing contact courses have recently been disapproved. If cancellation affects operation, new procedure should be submitted in accordance with AF Letter 55-6 and above criteria.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U.S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following are those which are now effective and distributed under AF Regulation 5-12. Base operations officers, weather and communication units, should check copies in use to insure that latest issues and all revisions are available. No manuals other than the following should be requested at this time under paragraph 5, AF Regulation 5-12.

GROUP I MATERIAL: II-B-2, Movement and Control Messages, July 1, 1948; II-B-3, Notices to Airmen, First Edition May 1, 1949 with one revision; Contractions, Fourth Edition, Dec.1, 1949; Location Identifiers, Third Edition, Sept. 15, 1948, with 17 supplements.

GROUP II MATERIAL: II-B-5, Airways Air-Ground Communications, Second Edition, Sept.1, 1948, with two revisions.

GROUP III MATERIAL: II-B-7, Landline Operating Procedures, April 15, 1945.

GROUP IV MATERIAL: Civil Airways Mileage Chart of July 27, 1949.

GROUP V MATERIAL: Service "A" Manual, Feb. 21, 1950 with four revisions; Service "C" Manual Jan. 24, 1950; Teletype Maps: M-10, Jan. 1, 1949; M-11, Dec. 1, 1949; M-13, June 15, 1948; and M-14, July 1, 1948.

GROUP VI MATERIAL: Teletype Maps: Drawing M-58, April 1, 1949; Drawing M-59, Jan. 5, 1949.

✓ U.S. AIR FORCE CONTROL TOWERS AND RADIO RANGES DISCONTINUE GUARD ON 3105 KC: Effective March 1, 1950, USAF control towers and radio ranges have discontinued guarding 3105 kc. Only activities which will maintain guard on this frequency will be those requiring same due to presence of civil aircraft on the field, in the traffic pattern, or upon receipt of civil inbound flight plan.

✓ CORRECTIONS AND AMENDMENTS TO T.O. 08-15-3: (1) Correct page 32, under Chicago, Ill. (Procedure No. 1) by changing listing to Chicago-Midway, Ill. Change minimum alt. authorized after passing marker or int.: NW-1500' (Wilson Int.-Final). Missed Approach Procedure: Climb to 2500' on N and S courses of Harvey Rng Sta proceeding S to Momence Int.; or alternate procedure (when directed by ATC) climb to 2500' on SE crs of Chicago Rng, proceeding to Thornton Int. OR: Make left turn, climb to 2500' on NE crs Chicago Rng, proceeding to Lakeshore Int.

(2) Correct page 33, under Chicago, Ill. (Procedure No. 2), by changing listing to Chicago-Midway, Ill. Missed Approach Procedure: Make right turn and climb to 2500' on NE crs Chicago Rng (or when directed by ATC), make left turn, climb to 2500' on W crs Chicago, proceeding to Downers Grove Int.

(3) Correct page 35, under Colorado Springs, Colorado, by adding Min. Alt. authorized after passing marker or int.: N-7500' (Black Forrest FM-Final). Substitute remarks: **Stall speed formula not applicable. Visibility 1 mi. authorized for acft having stall speeds 75 mph or less, day only. Minimum ceiling 600' if final approach made from Black Forrest FM.

(3.5) Correct page 148, under Sinclair, Wyo. by deleting procedure. This fld abandoned.

(4) Correct page 165, under Walker AFB, N. Mex., by showing radio range name changed to Roswell; Ident. ROW; Courses realigned to 29-122-209-302.

(5) Correct page 150, under Smoky Hill AFB, Kans. as follows: Effective April 14, 1950, instrument approach procedure is cancelled inasmuch as radio range will be decommissioned.

(6) Correct listing under Oakland, Calif., by showing Min. alt authorized after passing marker or Int.: NE-3000' (Bay Point FM); SE-3500' (Evergreen FM); and 500' (Newark FM) (Final); Low cone: 500'.

(7) Correct listing under Blytheville, Ark., by deleting procedure as this has been cancelled.

(8) Correct listing under Maxwell, Ala., by showing tower VHF frequencies as CHAN B-C; add: Montgomery Approach Control.

(9) Correct page 63, under Fort Wayne (Baer Field), Ind., by changing Initial approach altitude to SW-2000' (Int S crs GSH).

(10) Correct page 69, under Grand Rapids (Kent Co. Arpt), Mich., by changing Initial approach alt. to SE-2000' (Int. N crs Battle Creek). Delete remarks: *Approved for DC-3 and smaller aircraft only. Also delete asterisk associated with 500' ceiling.

(11) Correct page 128, under Portland, Ore., by changing Min. Alt. authorized after passing marker or int. to N-2500' (Woodland FM); 1500'-(La Center FM-Final).

(12) Correct page 137, under Rockford (Machesney Arpt), Ill., by changing Initial approach alt to W-2500' (Int. N crs Moline Rng.). Complete procedure turn within 10 mi.-2100', 15, 20 and 25 mi.-2200'. Low cone: 1500'. Add asterisk to ceiling 600' and add to remarks: *Minimums are for acft having stall speeds of 75 mph or less.

(13) Correct page 143, under San Francisco, Calif., by changing Min alt. authorized after passing marker or int to SE-1700' (Evergreen FM); 700'-(Belmont FM-Final). Change ceiling over airport to: 600'. Min. alt over airport: 610'. Low cone: *1050'. Add to remarks: *If Belmont FM is received, descent to 700' over rng sta on final approach is authorized.

(14) Correct listing under Mitchel AFB, N.Y., by showing Initial approach from SW as SW-1500' (Int E crs IDL). Delete shuttle. Change first sentence of Missed Approach Procedure to: Climb straight ahead at 800' for not more than 1 minute.

✓ CHANGE FOR USAF PILOT'S HANDBOOK SPECIAL JET-U.S.: Correct listing under Connally Air Force Base, Waco, Texas, by changing weather minimum (ceiling) to 3000'.

✓ CHANGE FOR PHACUS: Correct AL Chart 376, Hamilton AFB, San Rafael, Calif., as follows; Change Initial approach alt after Richmond int. to 4000'. Final approach crs: 260° inbound, 80° outbound. Procedure turn: Left side of final approach track within 10 or 15 mi. at 2000'. Low cone: 500'. Minimum alt over airport: 500'. Missed approach procedure: If contact not established at RBN, make left turn, proceed out on a heading of 130° climbing to 4000'. PROCEDURE NOT APPROVED FOR USE BY AIR FORCE AIRCRAFT EXCEPT IN EMERGENCY.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D.C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C.

All Naval Air Stations and Air Facilities are directed to notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO.. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U.S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

MANDATORY GUARD ON 3105 KC DISCONTINUED: Mandatory guard on 3105 kc at Naval and Marine Air-ground communications installations are being discontinued.

CIVIL SPECIAL NOTICES

✓ CAA AIRWAY COMMUNICATIONS STATIONS GUARDING 126.7 MC: Receiving watch on 3117.5 kc, airline frequency, will be discontinued by all CAA airway communications stations shortly after July 1, 1950. A continuous receiving watch on 126.7 mc, airline enroute frequency, is now stood by all CAA airway communications stations. Soon, all CAA stations will use it as a transmitting frequency also as many stations are already doing so.

PROPOSED DISCONTINUANCE OF 111.1 MC BY CAA: Proposed discontinuance of 111.1 mc transmitting frequency by CAA Airway Communications Stations has been deferred. All pre-advertised discontinuances by Airway Communications Stations should be disregarded.

✓ ON-REQUEST REPORTING POINTS: Effective immediately the following On-request Reporting Points are established:

(1) EDEN - Int.of N crs Maxwell AFB, Ala., and E crs Birmingham, Ala.
(2) SELAH - Int.S crs Ellensburg, Wash. and NW crs Yakima, Wash.
(3) MODOC - Int. N crs Klamath Falls, Ore. and E crs Medford, Ore.
(4) TENNANT - Int. S crs Klamath Falls, Ore. and E crs Ft. Jones, Calif.
(5) CANTON - Int. SE crs Helena, Mont. and NW crs Bozeman, Mont.
(6) ATHENA - Int. E crs Pendleton, Ore. and SW crs Walla Walla, Wash. (Formerly named "Cayuse")
(7) ELKINS - Int. NE crs Roswell, N.Mex. and W crs Lubbock, Texas.
(8) WILLARD - Int. S crs Otto, N.Mex. and the center line of Red Airway No. 88.
(9) FLYING "M" - Int. N crs Hobbs, N.Mex. and W crs Lubbock, Texas.

✓ INTERSECTION NAME Effective immediately the following Compulsory Reporting Point will be known as PT. DUME INTERSECTION: The int. of the W crs of Los Angeles, Calif. (VHF) and the SE crs of Camarillo, Calif. Range.

✓ AMENDMENTS TO PUBLISHED MINIMUM EN ROUTE INSTRUMENT ALTITUDES: The following amendments to published minimum en route instrument altitudes will become effective upon publication in the Federal Register:

	From	To	Min. Alt.
Green Airway No. 4 is amended to read in part:	Lebo, Kans.	Pomona (Int.),Kans.	2300'
	Pomona (Int.),Kans.	DeSoto (Int.),Kans.	2200'
	DeSoto (Int.),Kans.	Kansas City, Mo.	2000'
Amber Airway No. 4 is amended to eliminate:	Baldwin City (Int.),Kans.	Kansas City, Mo.	2200'
Red Airway No. 11 is amended by adding:	Ardmore, Okla.	Tulsa, Okla.	2700'
Red Airway No. 11 is amended by deleting:	Angola (Int.), N.Y.	Mt. Morris (Int.),N.Y.	3500'
Red Airway No. 17 is amended by adding:	Tulsa, Okla.	Verdigris River (Int.), Okla.	1800'
Red Airway No. 31 is amended to read in part:	Waterloo (Int.),Ill.	St. Elmo (Int.),Ill.	1900'
Red Airway No. 40 is amended to read in part:	Pierre, S.D.	Int. E crs Pierre,S.D. & SW crs Huron,S.D.	3300'
	Chunu (Int.),Alaska	*Adak, Alaska	4900'
	(6600'-Minimum crossing altitude at Adak, Alaska, Northeastbound)		
Red Airway No. 45 is amended by adding:	Blackstone, Va.	Manakin,Va.(Rbn)	1500'
Red Airway No. 57 is amended to read in part:	Manakin, Va. (Rbn)	Quantico, Va.	1500'
Red Airway No. 61 is amended by adding:	Battle Creek, Mich.	Toledo, Ohio	2200'
Red Airway No. 62 is amended by adding:	Johnstown,Pa.(Rbn)	Flintstone (Int.),Pa.	4500'
Red Airway No. 64 is amended to read in part:	Mt. Pleasant (Int.),Pa.	Johnstown, Pa.(Rbn)	4500'
Red Airway No 65 is amended to read in part:	Johnstown, Pa. (Rbn)	Altoona, Pa.	4500'
	Dixon (Int.), B.C.	Annette Isl.,Alaska	4700'
	*Oceanside, Calif.	Julian, Calif. (Eastbound)	9000'
	7000'-Minimum crossing alt. at Oceanside,Calif.E-bound.		
Blue Airway No. 5 is amended to read in part:	Okla.City, Okla.	Oxford (Int.),Kans.	3000'
Blue Airway No. 6 is amended by adding:	Oxford (Int.), Kans.	Wichita, Kans.	2500'
Blue Airway No. 7 is amended to read in part:	Jerseyville (Int),Ill.	Belleville, Ill. (Scott)	1900'
Blue Airway No. 13 is amended to read in part:	Gilroy (Int.),Calif.	Altamont (Int.),Calif.	6500'
	Altamont (Int.),Calif.	Fairfield Suisun,Cal.	5000'
Blue Airway No. 22 is amended to read in part:	Excelsior Springs (Int.) Mo.	Int. NW crs Kirksville, Mo., & S crs Des Moines, Iowa	2200'
Blue Airway No. 24 is amended by adding:	Little Rock, Ark.	Ft.Smith,Ark.(VOR)	3800'
	*Indio, Calif.	Palm Springs (Int.), Calif.	13,000'
	12,000'-Minimum crossing altitude at Indio, Calif., Northbound		
Blue Airway No. 35 is amended to read in part:	St. Joseph, Mo.	Bedford (Int.),Mo.	2400'
Direct Routes-Northeast U.S. is amended to read in part:	Charleston, W.Va.	Pulaski, Va.	6000'
	Johnstown, Pa.	Phillipsburg, Pa.	4700'
	Ottumwa, Iowa	Quincy, Ill.	2500'
Direct Routes-Northeast U.S. is amended to eliminate:	Blackstone, Va.	Washington, D.C.	1500'
	St. Louis, Mo.	Ottumwa, Iowa	2500'
Direct Routes-Southeast U.S. is amended by adding:	Roanoke, Va.	Danville,Va. (Southeastbound)	4200'
	Roanoke, Va.	Danville, Va. (Northwestbound)	4500'

4-11-50

Direct Routes-Southeast U.S. is amended to eliminate:	Lexington, Ky.	Louisville, Ky.	2400'
	Tulsa, Okla.	Ardmore, Okla.	2700'
Direct Routes-Southeast U.S. is amended to read in part:	La Grange, Ga.(VOR)	Columbus, Ga. (Rbn)	2000'
	Tri-City, Tenn.	Asheville, N.C.(VAR)	9000'
	(Via SE crs Tri-City, Tenn., & NE crs Asheville, N.C. [VAR])		

✓ DANGER AREA DESIGNATIONS: The following Danger Area amendments will be in effect as dated unless otherwise advised:

AMENDMENT NO. 32 (April 11, 1950)

An Oswego County, New York, Area is added to read:

Location: Oswego County (Albany Chart); Description: A circular area with a radius of 1000', centered at lat 43-18-09N, long. 75-58-44W; Altitudes: Surface to 3000'; Time: Continuous, April 11 thru October 30, 1950; Using Agency: Syracuse University, Syracuse, New York.

AMENDMENT NO. 33 (April 22, 1950)

An "Exercise Swarmer", temporary area, over parts of North and South Carolina, see last two pages.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: (1) Correct Airman's Guide, Vol. 5, No. 1, dated March 28, 1950, page 58, Item 3, by showing to read as follows: "Correct C. & G.S. Little Rock Aeronautical Sectional Chart, dated Feb. 7, 1950, by changing the Little Rock, Ark. VOR frequency to 113.9 mc.

(2) Correct Flight Information Manual supplement appearing in Airman's Guide, Vol. 5, No. 1, as follows: Instrument Landing System Procedures, under Fargo, N.D.: Change distance from Barnesville FM to S crs ILS to 21.0 mi.

(3) Correct Flight Information Manual, dated February 1, 1950, as follows:

(a) Page 224, under Rapid City, S.D.: Change procedure turn minimum alt. at 10 mi. from range station to: 5000' E side S course.

(b) Page 243, under Topeka, Kans.: Delete asterisk in fourth column, and asterisk and note in remarks column concerning visual courses being unmonitored.

(c) Page 82, opposite Van De Graaf Field, Tuscaloosa, Ala., insert Ident. TCL.

(d) Page 7, note at bottom of left column should be corrected to read: "So file an arrival report. See page 39".

(e) Page 39, Paragraph 4, should include ". . .given on page 111 of this manual..."

(f) Page 140, 4th column, under Green Airway No. 3, Ogen, Utah should be shown as Ogden, Utah.

(g) Page 218, under Ogden, Utah, Procedure No. 2, Straight-in Minimums should be shown as 1000', 2 mi. day and night.

(4) Correct Dallas Sectional Aeronautical Chart, dated Feb. 19, 1950, by reversing the N-A quadrant on the NW crs of Wichita Falls Radio Range. Large dammed lake, Lake Kickapoo, at approximately 33°40' N, 98°48'W, should be spotted as it is being confused with Lake Diversion, 12 miles NW of Lake Kickapoo.

(5) Correct Little Rock Sectional Aeronautical Chart, dated Feb. 7, 1950, by amending frequency of omnirange to read: 113.9 mc; correct outbound heading on NW crs of Little Rock LF Range to 286°.

(6) Correct Washington Sectional Aeronautical Chart, dated Jan. 12, 1950, by adding Wildwood Mun. Airport to chart. Location: 6 mi. WNW of Wildwood at lat 39-00-15, long. 74-54-30. Class: 22-H50.

(7) Correct C. & G.S. Radio Facility Chart No. 25, dated March 1, 1950, under Rochester, N.Y. INSAC by deleting guard of 121.5 mc.

(8) Correct C. & G.S. Radio Facility Chart No. 19, dated January 11, 1950, under Strevell, Idaho, by adding receiving frequency of 121.5 mc; and by showing the MH facility operating on request.

✓ CORRECTIONS AND AMENDMENTS FOR FLIGHT INFORMATION MANUAL: Correct Vol. 4, No. 2 dated Feb. 1, 1950 by changing minimum enroute instrument altitudes as follows: Page 140, Green 2, Wixom (FM), Mich. to Detroit, Mich. southbound 2000. Page 143, Green 8, 8000 Minimum Crossing Altitude at Cold Bay, NE bound. Page 147, Red 12, Burlington, La. should read Burlington, Iowa. Page 157, Direct Routes, Flintstone should read Flint Stone (Int). Page 160, Direct Routes, Palm Springs (Int), Calif. to Needles, Calif. NE bound - 8000.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods,etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. These temporary conditions cannot be given immediate coverage in the Airman's Guide, but Teletype Notam service gives the desired coverage on any facility or field at which teletype facilities are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

WEATHER REPORTING SERVICE

Weather Reporting Location	Lat., Long.	Elev.	Change in Weather Service
Columbus, Ind. (Atterbury AFB)	39°16', 85°54'		Hourly to be available soon
Spearfish, S. Dak. (Black Hills Arpt)	44°29', 103°47'	3909'	SW to be available soon
Hot Springs Mun. Arpt., N. Mex.	33°14', 107°17'	4850'	SW to be available soon
Socorro Mun. Arpt., N. Mex.	34°02', 106°54'	4759'	SW " " " "
Princeton Arpt., Maine	45°12', 67°34'	250'	Hourly report to be available soon
Casper, Wyo. (Natrona Co. Arpt.)			SW no longer available
Lyons Peak, Calif.			Hourly report no longer available

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: ANNISTON-RADIO: VHF omnirng radials 275°, 290° 260°, 90°, 105°, 75° flgt-checked, usable. (3-20)

ANNISTON ARPT: Ctn, strip extensions in progress. Equip on fld. (3-3)

BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two hi-intensity rnwy lgts are lctd in center of black top rnwy. (11-23) No Navy acft svcg avail from lcl sunset to 0800 CST. (12-15) NAS Birmingham assumed oper of acft crash and rescue equip at Municipal Arpt between hrs 0001 and 0700. 1 hr notice prior to lndg is req of all mil acft in order to alert the crash crews. Such notice will normally be transmitted to Birmingham Twr by Maxwell Flgt-Service and then to the Naval Air Station Officer of the Day. (4-5)

BROOKLEY AFB (MOBILE)-TOWER: USAF GCA inop. (3-12)

CRAIG AFB (SELMA): Ext inst trng on Craig rng 0800-1700 during IFR conditions. (2-6)

EVERGREEN-RADIO: VHF omnirng radials 35°, 50°, 20°, 220°, 235°, 205° flgt-checked, usable. (3-20)

ALABAMA: EVERGREEN-MIDDLETON ARPT: Vehicular tfc on fld intermittently at all hrs. Rnwys, taxi strips being used as access road to adj ind. Use extreme ctn. (3-24)
**FT. MORGAN ARPT: (New Fld). Lat 30-13-30, long. 88-01-00. (4-5)
HUNTSVILLE-RADIO: VHF omnirng radials 190°, 205°, 175°, 360°, 15°, 345° flgt-checked, usable. (3-20)
JASPER-WALKER CO ARPT: Soon new graded NW/SE Strip (2600' x 250') will be open to acft. Ctn, trees and power line NW. (4-10)
LANETT-VALLEY ARPT: NE/SW Strip clsd (const). (3-20)
MAXWELL AFB (MONTGOMERY)-RADIO: Rng flgt-checked and found satisfactory. N leg has multiples 50 mi from stn. Z mrkr not reliable above 4000'. (3-9)
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (1-17)
★MOBILE-RADIO: Effect April 4, apch ctl on rng freq 248 kc comm. (4-5) VHF omnirng radials 50°, 65°, 35°, 230°, 245°, 215° flgt-checked, usable. (3-20)
MONTGOMERY-RADIO: VHF omnirng radials 10°, 25°, 355°, 50°, 65°, 35°, 120°, 135°, 105°, 220°, 205°, 235°, 320°, 335°, 305° flgt-checked, usable. (3-20)
MUSCLE SHOALS-RADIO: Ctn advised on VHF omnirng thru northern sector within 20° E and W mag. north where severe course indicator roughness is present. (1-20)
**SYLACAUGA ARPT: ABANDONED. (4-10) These data rcvd too late for inclusion in Directory of Airports.
TUSCALOOSA-RADIO: VHF omnirng radials 40°,55°,25°,240°,255°,225° flgt-checked, usable. (3-20)
**TUSCALOOSA-VAN DE GRAAFF FLD: Lctn ident assigned: TCL. (4-4)
ARIZONA: **BISBEE ARPT: Correct lat 31-22-15, long 109-52-30. (3-21)
DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. Rnwy 8-26 clsd. (12-29)
**DEWEY-FAIN RANCH ARPT: (New fld) Lat 34-34-15, long 112-16-00. (3-10)
DOUGLAS-RADIO: VHF omnirng radials 180°, 173°,220°, 230°,250°,260°,285°, 300°, 360°,30°, 49°, 105°, 130°, 160° flgt-checked, usable. (3-9)
**FLORENCE ARPT: Correct lat 32-58-45, long 111-21-30. (2-21)
GILA BEND-RADIO: VHF omnirng radials 260°, 70°, 85° flgt-checked, usable. (3-9)
GILA BEND AF AUX: All obsts except 208' twr 1/2 mi S of fld not lgtd. (12-8)
**GLENDALE-FRAM ARPT: Correct lat 33-31-45, long 112-16-00. (2-24)
**GLENDALE-THUNDERBIRD NO. 1 ARPT: Correct lat 33-37-00, long 122-10-30. (2-27)
GOODYEAR AF AUX: Student trng during daylgt hrs only. (1-26)
PHOENIX: Exten trng on Phoenix Rng on all courses except W. (11-2)
PHOENIX-SKY HARBOR ARPT-TOWER: Effect Dec 15, 1949, CAA ILS was shut down. FLD: Rnwys 8L-26R and 17-35 clsd. 2-way rdo rqrd on Rnwys 8R-26L and 3-21. Rdo rcvr rqrd on all other lndg areas. Area between Rnwy 8L-26R, N taxi strips and between Rnwy 17-35 W to crossover clsd, mrkd. NW end Rnwy 12-30 shortened to 4000'; NE end Rnwy 3-21 shortened to 500', mrkd. Nordo crop dusters rstd to use of dirt mat area. (2-16)
PRESCOTT-RADIO: VHF omnirng radials 240°, 255°, 335°, 65°, 80°, 110°, 125°, 225°, 235° flgt-checked, usable. (3-9)
**TUBA CITY ARPT: (New Fld) Lat 36-08-00, long 111-15-30. (3-9)
TUCSON-RADIO: VHF omnirng radials, 283°, 130°, 111°, 261°, 246° flgt-checked, usable (3-9)
**WEBB ARPT: Correct lat 31-46-15, long 109-42-00. (3-21)
YUMA-RADIO: VHF omnirng radials 235°, 250°, 80°, 95° flgt-checked, usable. (3-9)
YUMA COUNTRY ARPT: Ctn, const along edge of Rnwy 17-35 between hrs 0700-1700 daily. (4-10) These data rcvd too late for inclusion of + in Directory of Airports.
ARKANSAS: BLYTHEVILLE-RADIO: About April 30, LF rng and stn lctn mrkr will be re-comm for cont oper thru Aug 6, 1950. Freq: 221. Ident: BYH. Courses will be: 45 A 119 N 225 A 299 N. (4-5)
CAMDEN-HARRELL ARPT: Ctn-const. (3-9)
FAYETTEVILLE-RADIO: About April 17, VHF omnirng will be shut down-modification. (4-6)
FLIPPIN-RADIO: About Apr 10, VHF omnirng will be shut down-modification (3-23)
FORT SMITH-RADIO: VHF omnirng on 113.1 mc unreliable. (10-15)
FORT SMITH ARPT: Asphalt portion W end E/W Rnwy unsafe for acft of twin-eng size or larger. Blacktop N/S Rnwy clsd, repairs. 2' obst lgtd ditch being dug 1000' S of N end of rnwy and completely across rnwy. (3-20)
LITTLE ROCK-RADIO: About Apr. 17, VHF omnirng will be shut down until approx Apr. 19 - modification. (3-23)
★PINE BLUFF-RADIO: April 10, transmitter fac on 121.5 mc comm. These data rcvd too late for inclusion on ANRA page. (4-10)
ROUND POND ARPT: Flooded, hazardous. (3-2)
TEXARKANA-RADIO: VHF omnirng radials 8 mi out from stn, course roughness and mild bends. (11-16) Mar 28 stn lctn mrkr flgt-checked, oper normal. (3-28)
WALNUT RIDGE-RADIO: LF rng courses aligned by gnd-check only. (11-3) VHF omnirng operg on 115.7 mc normally from gnd observation only. Ctn advised until flgt-checked. (12-20)
CALIFORNIA: ★ALAMEDA NAS-RADIO: A/G voice commun now oper as follows: Trans: 3195, 6290 kc. Grds: 3195, 6290 kc. Call: Navy Alameda Rdo. Oper cont. (3-27)
ALAMEDA NAS: Maint high apch on Rnwys 26L and 21, hvy acft parked these areas. (2-15)
BAKERSFIELD-KERN CO. ARPT-TOWER: About April 17, CAA ILS lclzr and glide path will be shut down until approx May 1. (3-18)
BLUE CANYON INT FLD: Clsd (snow). (1-3)
★BLYTHE-RADIO: VHF omnirng correct lat 33-35-40, long. 114-45-45. (3-30) VHF omnirng radials 260°, 275°, 80°, 95°, 45° flgt-checked, usable. (3-9)
**BOULEVARD-J 3 RANCH ARPT: Correct lat 32-42-00, long 116-16-00. (3-21)
BRAWLEY ARPT: NW/SE Strip and tie down area N of hangar under const. Use rnwy mrkd by white discs and bndry lgts. (12-30) NE/SW, E/W Strips clsd. (1-13)
BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans P-80 acft except on special projects for modification. (11-15)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft shall oper below 300' during VFR weather conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.
CAMBRIA-PINES ARPT: Soft when wet. (2-11)
CAMP PENDLETON OLF (OCEANSIDE): Trans acft clear thru MCAS El Toro. (10-5)
CASTLE AFB (MERCED): Use only Rnwy 12-30, acft parked on lndg mat. (12-22)
COSO JUNCTION ARPT: E/W Strip under const. (1-13)
DAGGETT-RADIO: VHF omnirng radials 211°, 226°, 258°, 273°, 61°, 46°, 24°, 94° flgt-checked, usable. (3-9)
EDWARDS AFB (MUROC): Lctd within a danger area. Clsd to all trans acft except on written permission C.G., Air Materiel Command. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont to fld. (8-31)
EL CENTRO NAAS: Const on rnwy. (3-20)
EUREKA-HUMBOLDT CO. ARPT: Equip on fld intermittently day, ngt. Ditch on W side NW/SE Taxiway filled but extremely soft. 6' unlgtd jet FIDO unit 800' from SE end Rnwy 31, 200' E rnwy centerline. Use rnwys, taxiways only. (1-10)
FAIRFIELD-SUISUN AFB-TOWER: USAF ILS inop until approx May 1. (3-23) FLD:
** Correct lat 38-15-45, long 121-56-00. (2-23)
FORT JONES (new) ARPT: Clsd (snow). (2-14)
FRESNO-RADIO: VHF omnirng radials 318°, 331°, 26°, 53°, 68°, 91°, 106°, 121° flgt-checked, usable. (3-9) VHF omnirng on 112.9 mc, gnd-checked only. (4-9)
**GRASS VALLEY-MacBOYLE ARPT: Reinstated. lat 39-13-15, long 121-00-30. (2-20)
HAYWARD ARPT: Taxiways and lndg mat parallel Rnwy 28 clsd. (2-16)
HOLLISTER ARPT: All rnwy lgts inop. (1-24)
HOLLYWOOD: Soon rot. hazard bcn displaying red only lctd on Mt. Lee at lat 34-08-04, long. 118-19-10 will be perm extinguished. (4-10)
INDIO-RADIO: About April 15, INSAC will be relctd to new quarters at Thermal Arpt. LF rng will remain in its present lctn. (4-3) Name and ident will be changed to: Thermal, "TRM".
KING CITY ARPT: 2000' S end and 500' N end N/S Rnwy unlgtd. Center portion lgtd on req. Ctn, embankment N end N/S Rnwy. (2-10)
LOS ANGELES INTERNATIONAL ARPT-TOWER: CAA ILS operg from temp lctn 2125' W
** of W end of Rnwy 25L. Course aligned to center to Rnwy 25L and is normal by flgt-check. Lclzr back course not usable. March 31, new mobile CAA ILS lclzr on channel "V", 108.7 mc comm on test basis. Antenna array and transmitter truck lctd 4557' W of W end Rnwy 24R, obst lgtd. Disregard spurious signals. Not flgt-checked. (3-31) FLD: Hi-intensity slope line apch lgt system aligned on Rnwy 25L opers dusk to dawn. Remain between white lines on Rnwy 7R-25L, const along sides. Taxying only on Rnwy 4-22. Const equip W end Rnwy 25R, 1000' out on apch to Rnwy 7L-7R. Use paved areas only. About Apr. 15, neon apch lgts on Rnwy 25L will be discontd. (3-31)

CALIFORNIA: LOS ANGELES-METROPOLITAN ARPT: Ditch digging both ends, 10' W of and parallel to Rnwy 16-34. Equip along edges of rnwys and taxiway W side S end Rnwy 34, marked. (2-10)
MARCH AFB (RIVERSIDE): Inter inst trng in AT-6 acft days Mon thru Fri. Rnwy 7-25 clsd, parked acft. (12-29)
McCLELLAN AFB (SACRAMENTO): Rnwy 4-22 perm clsd. (2-28)
MODESTO-RADIO: VHF omnirng radials 299°,314°,340°,355°,55°,114°,129° flgt-checked, usable. (3-9)
MOFFETT NAS (MTN. VIEW)-RADIO: Navy VHF/DF unreliable. (1-6)
MOFFETT NAS (MTN. VIEW): Fld on positive ctl. (2-15)
★MONTAGUE-RADIO: April 11, transmitter and rcvr on 121.5 mc comm. at INSAC. These data rcvd too late for inclusion on ANRA page.
★MONTEREY NAAS-RADIO: Navy VHF/DF unit has been installed and is now operg at this activity. (3-28)
MONTEREY-PENINSULA ARPT: Equip end Rnwy 28. Observe twr for lgts in addition to rdo clearance. (2-1)
OAKLAND ARPT-TOWER: About April 3, CAA ILS lclzr and glide path will be shut down until approx April 18. Mrkrs will continue to oper unmonitored. (4-4) FLD: Rnwy 6-24 rstd to lndg and take-off of lgt acft and taxying by all acft. Channel clsd to seaplanes, LST craft moored in channel. Lgt acft lndg gravel area 27, lnd beyond white line. (1-6)
PASO ROBLES-SHERWOOD ARPT: NW/SE Rnwy ruf at intsxn NE SW Rnwy Water standing on NW/SE Rnwy wet weather. Lnd short when using NW SE Rnwy (1-6)
RED BLUFF-RADIO: VHF omnirng radials 318°,333°,348°,126°,141° flgt-checked, usable. (3-9)
REEDLEY-GREAT WESTERN ARPT: 20' extreme SSE end of lndg strip very ruf. (3-3)
••RIALTO-MIRO-FONTANA ARPT: Correct lat 34-07-00, long. 117-23-30. (2-1)
SACRAMENTO-RADIO: VHF omnirng radials 202°,217°,232°,307°,322°,03°,18°,33°,51°,128°,143° flgt-checked, usable. (3-9) Auto. rng course monitor device temp decomm. (2-8)
SACRAMENTO ARPT-TOWER: About April 7, CAA ILS will be operg on test-basis and will serve NE/SW rnwy with apch from SW. Lclzr freq: 108.3 mc. Ident: "SAC". OMK freq: 308 kc. MMK freq: 263 kc. Glide path freq: 332.6 mc. Disregard spurious signals. (3-25)
SAN DIEGO-RADIO: VHF omnirng radials 262°,277°,142°,127° flgt-checked, usable. (3-9)
SAN DIEGO COUNTY (BROWN) FLD: All acft maint 1100' MSL in pat, due to joint opers with Navy. Lgt acft lnd on blacktop only. (3-9)
SAN DIEGO-GIBBS ARPT: Rnwy lgts inop. Clsd ngts to trans acft. (3-28)
SAN DIEGO-LINDBERG FLD-TOWER: April 1, until approx Aug 1, const of new ctl twr will be in progress. During this time service will be rendered from a temp ctl twr on all existing freq on a cont basis except during the period April 1, to April 10, when frequent interruptions to service may be experienced during the move to the temp lctn. (3-20)
••SAN DIEGO NAS: The load capacity of the rnwys and mat area are as follows: Rnwy 18-36 and taxiways 30,000 lbs max. weight per wheel. Rnwy 11-29 40,000 lbs max. weight per wheel; Mat area 34,500 lbs max. weight per wheel. (4-5) Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft lnd on hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious Base, tfc lanes at North Island. (2-15)
SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6)
SAN FRANCISCO-RADIO: VHF omnirng radials 233°,276°,282°,297°,322°,18°,107°,129° flgt-checked, usable. (3-9)
SAN FRANCISCO ARPT-TOWER: CAA ILS lclzr unreliable daylgt hrs due to arpt const in vicinity of transmitter. (4-11) FLD: Two neon apch lgts and a green crs lgt installed Rnwy 28L. (3-30) Unlgtd paved area N of Taxiway 5 (portion of former Rnwy 12-30) now multi-eng acft parking area. (4-11) Taxiway 1 clsd from W end Rnwy 10L to auto access road to trans acft parking area. Taxiway 3 clsd from N side of Rnwy 10R-28L to Taxiway 5, mrkd. Equip 500' S of end Rnwy 1L. Taxiway 5 clsd from E side Rnwy 1-19 thru to E end. Rnwy 10L-28R clsd, const. ILS lclzr and glide path aligned with clsd rnwy will remain in oper. Use with ctn. Parallel Rnwy 10R-28L (6500') lctd 750' S of clsd rnwy will be used for all E and W lndgs and take-offs. (4-11)
SANTA BARBARA ARPT: Taxiway 3 between intsxn with Taxiway 4 and apch end of Rnwy 25 perm clsd to acft with 20,000 lbs or more gross wt. (2-12)
VISALIA ARPT: Bcn inop. (2-26)

CALIFORNIA: ••WARNER SPRINGS-WARNER HOT SPRINGS ARPT. Correct lat 33-16-45, long. 116-40-30. (3-21)
WATSONVILLE ARPT: Rnwy 8-26 lgts inop. (3-3)
Colorado: AKRON-RADIO: VHF omnirng radials 46°,61°,154°,243°,83°,101°,139°,156°, 229°,295°,297°,334°, and alt change radial 260° flgt-checked, usable. (10-14)
••DENVER-STAPLETON ARPT: April 7, Green apch lgt at NE end of NE/SW Rnwy and N end of N/S Rnwy perm discontd. Rnwy 8L-26R clsd to acft larger than DC-3. (11-9) Soon green course lgts at neon apch lgt lane will be perm discont. (3-22)
EADS ARPT: N/S and E/W Strips usable but ruf. Rest of fld plowed up. (3-17)

DANGER AREAS AND FLIGHT PROCEDURES FOR EXERCISE "SWARMER"
(EFFECTIVE 22 APRIL TO 7 M[illegible]0 INCLUSIVE)

1. Exercise "SWARMER" will involve air and ground units on extensive maneuvers in the Fort Bragg, North Carolina and Greenville, South Carolina areas from 22 April through 7 May 1950 inclusive.

2. No aircraft, either military or civilian, shall be operated into or over these areas between April 22 and May 7, 1950, both dates inclusive, unless such operation is conducted in accordance with the authority granted by the maneuver commander for the Department of the Air Force, as indicated on the chart shown on the reverse side hereof.

3. Military aircraft not engaged in "SWARMER" will not enter or transit over or within these areas without prior permission. Aircraft having official business with the maneuvers or carrying important military or civilian observers should avoid flying into or over the areas, unless they will arrive in the area under VFR conditions and with a ground and flight visibility of at least 5 miles. In any event, aircraft intending to fly into and land in the area will file a complete flight plan, including justification for flight into area, at least one hour prior to departure with Flight Service who will procure approval from the Maneuver Commander. Take-off will not be made until the pilot has received approval of the flight from Flight Service.

4. Flights transiting the area will file a flight plan with Flight Service and receive approval of route and altitudes prior to take-off.

5. At certain times during the maneuver Pope AFB, Laurinburg-Maxton AFB, Greenville AFB and Camp Mackall AFB will be closed to all transient aircraft (including those carrying VIP's or official visitors). At such times, these aircraft should land at Pinehurst, Southern Pines, North Carolina, or Greenville Municipal Airport, South Carolina but may proceed to these two airports only under VFR conditions with a visibility, both ground and air, of at least 5 miles.

6. An EMERGENCY procedure for aircraft for which permission has been granted to enter the area under IFR conditions is established as follows: (This procedure will also be followed by aircraft entering under VFR conditions, when so directed by Flight Service)

a. In entering the Fort Bragg area aircraft will proceed via AMBER 7 AIRWAY to the Pope Radio Range at altitude assigned by CAA Air Traffic Control but not below 7000 feet msl. On arrival over Pope Radio Range, contact Pope Radio on Channel A (Able-140.58) for descent and landing instructions. If holding is necessary, an ADF holding pattern will be executed on the east side of the north leg of Pope Radio Range making all turns to the left. This procedure is illustrated on attached chart.

b. Aircraft destined for Greenville AFB will remain under CAA Traffic Control on airways until arrival over Greenville Radio at an altitude of 4000 feet or higher. Contact Greenville Radio on Channel A (Able-140.58) for further instructions to be received from Greenville AFB Approach Control.

7. It is essential that the cooperation of all transient, visitors and VIP aircraft be had with the above procedures, in the interest of safety as it is planned in the maneuver to operate transport aircraft between Greenville, Maxton, Pope and Mackall, at 3 minute intervals during day and night and under practically all weather conditions.

8. Further directives and detailed instructions, in addition to the above, may be obtained through Flight Service. Teletype NOTAMS should be consulted closely for amendments in these procedures made necessary by the progress of the maneuver.

By order of the Secretary of the Air Force
S. E. Anderson, Major General, U.S.A.F., Director, Plans and Operations

DANGER AREA

DANGER AREAS
EFFECTIVE APRIL 22 TO MAY 7, 1950

Area A-Flying permitted only at 1500' MSL and below, providing there exists 5 miles visibility or better. Flying also permitted at 9000' MSL and above, providing flight is conducted west of the "Fighter Line."

Area B-(Shaw AFB Area)-Flying permitted only below 2000' MSL, providing there exist 5 miles visibility or better. Extreme caution advised when in vicinity of Shaw AFB.

(MacKall, Pope, Laurinburg-Maxton Area)-Flying permitted only with prior approval from the Joint Operations Center at MacKall Air Force Base.

Area C-Flying suspended surface to 3000' MSL, except that VFR operations may be conducted when the visibility is 5 miles or better.

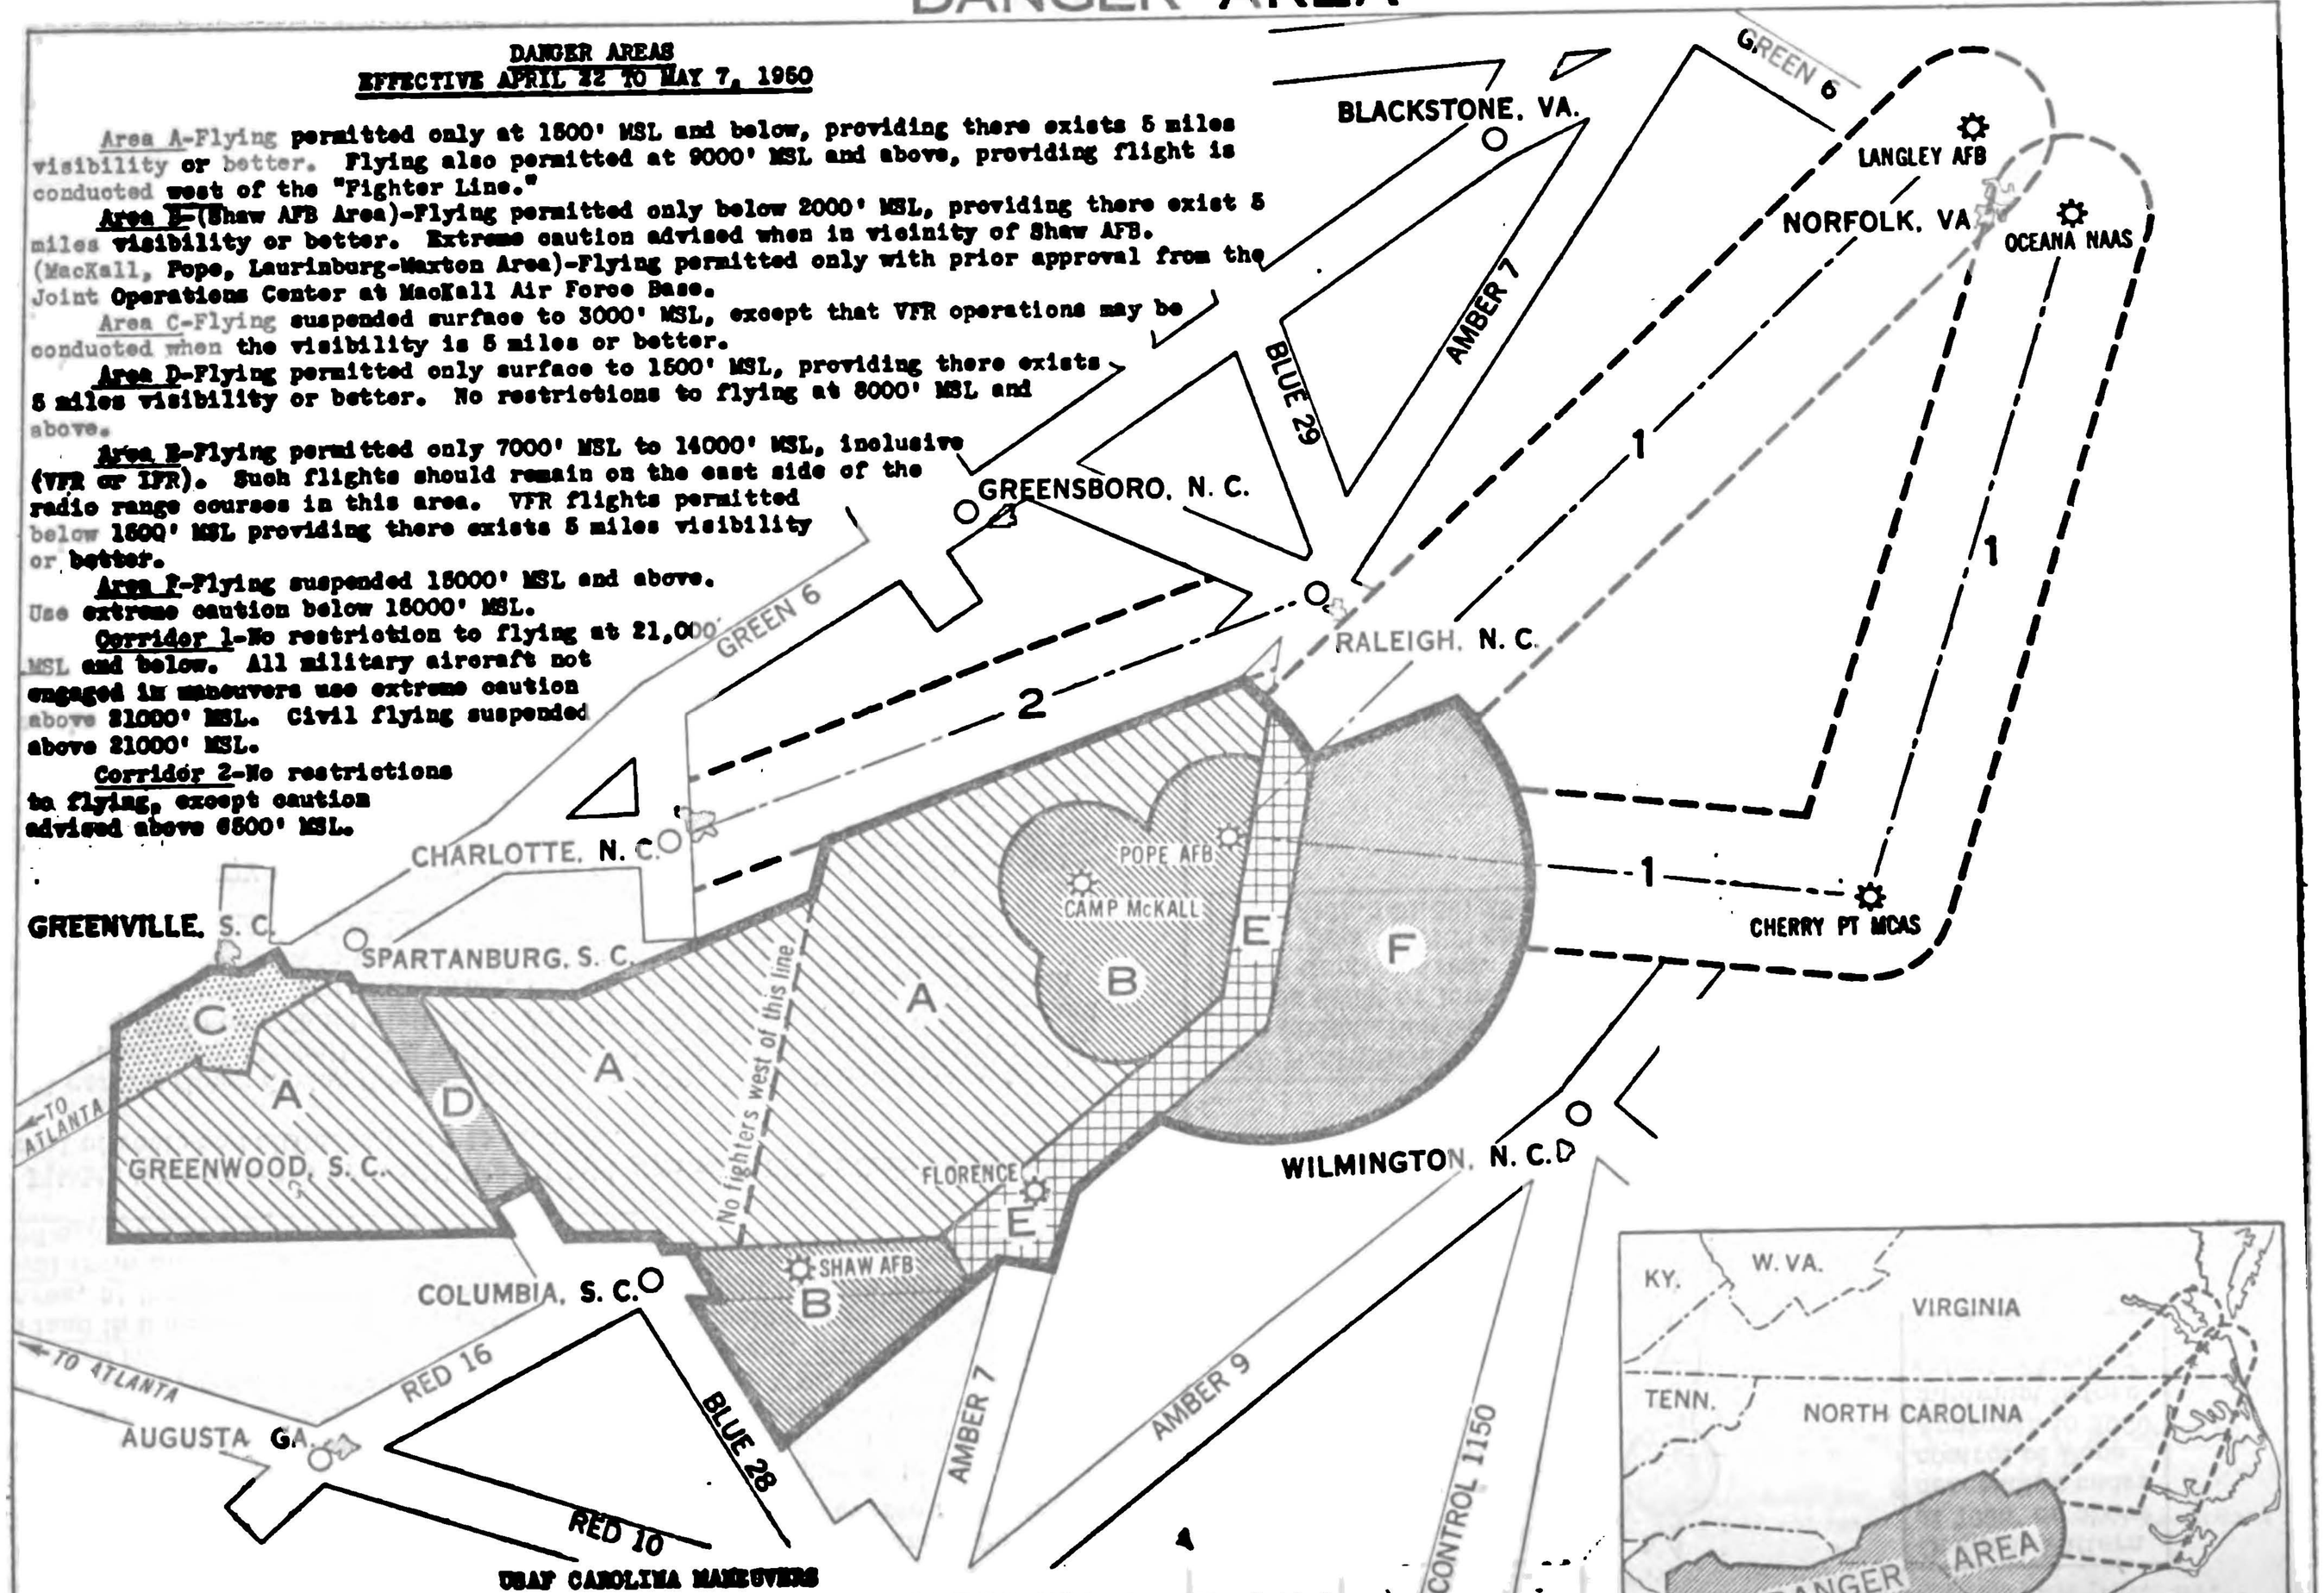
Area D-Flying permitted only surface to 1500' MSL, providing there exists 5 miles visibility or better. No restrictions to flying at 8000' MSL and above.

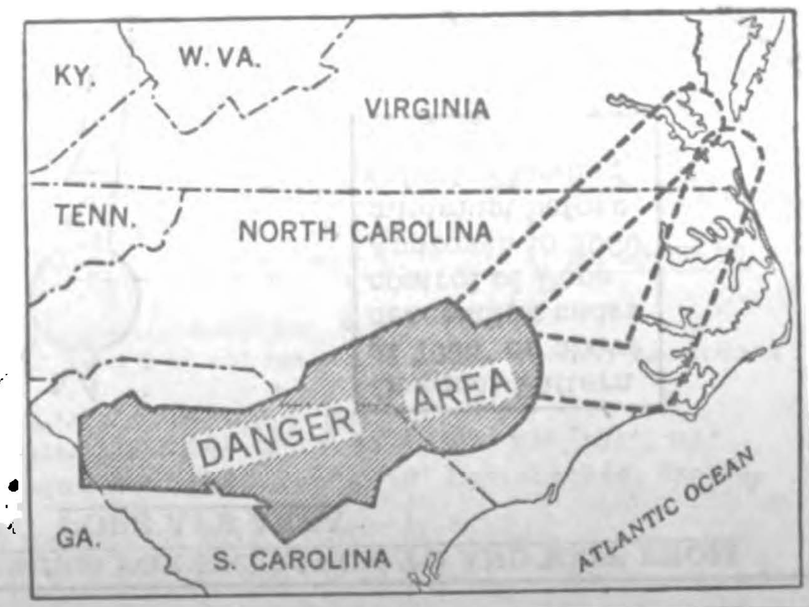
Area E-Flying permitted only 7000' MSL to 14000' MSL, inclusive (VFR or IFR). Such flights should remain on the east side of the radio range courses in this area. VFR flights permitted below 1500' MSL providing there exists 5 miles visibility or better.

Area F-Flying suspended 15000' MSL and above. Use extreme caution below 15000' MSL.

Corridor 1-No restriction to flying at 21,000' MSL and below. All military aircraft not engaged in maneuvers use extreme caution above 21000' MSL. Civil flying suspended above 21000' MSL.

Corridor 2-No restrictions to flying, except caution advised above 6500' MSL.





"EXERCISE SWARMER": EFFECTIVE FROM APRIL 22, 1950 TO MAY 7, 1950, inclusive, the United States Air Force will conduct intensive maneuvers in the Fayetteville, N.C., Greenville, S.C., Sumter, S.C., Area. These maneuvers will involve the flight of a large number of fighter, bomber, transport, and cargo type aircraft operating during both VFR and IFR weather conditions within the areas shown hereon, which have been set aside for the exclusive use of maneuver aircraft. Flying permitted as reflected in Legend.

AIRMAN'S GUIDE

CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airportsclosed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.

SPECIAL NOTICE

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO PILOTS AT CIVIL AND MILITARY AIRPORTS IN ACCORDANCE WITH THE FOLLOWING:

CAA GCA UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest GCA.

AIR FORCE GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective AFB.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call nearest air traffic control facility requesting GCA and further instructions.

Contact under VFR: VFR check-out training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, Air Force towers may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at pilot's discretion.

No AF unit can transmit directly on tower low frequency. In addition to frequencies listed below, Air Force GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NAVY GCA UNITS- Available to civil pilots in emergency or by prior arrangement with C.O. of respective NAS or MCAS.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility or associated station control tower.

Contact under VFR: VFR check-out training flights by prior arrangement with the C.O. of respective station.

Most Navy GCA units can transmit instructions on tower low frequency. In addition to frequencies listed below, Navy GCA emergency transmissions are made on 121.5 mc. Simplex service on 3117.5 kc is available at all installations as an alternate emergency frequency to work scheduled air carrier aircraft.

NOTE: Air Force and Navy GCA units require twenty (20) to thirty (30) minutes for warming up outside of scheduled hours of operation. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Ellington AFB, Texas	126.18,134.1,137.88, 137.7,HF	*,#				08-17 daily; 30 min req other hrs trng only.

EXPERIMENTAL UNIT

Arcata, Calif.	140.58,126.18;3105;HF; 278(E);but not 121.5	*,#	317'	100'	1/4	Available only from 08-1630 Mon-Fri; and then only on prior req for official business or emergency.

LEGEND

G/T = Guards all frequencies on which station transmits. "G/T except 3295" indicates transmitting frequency 3295 kc not guarded.
HF = 3475,4890,6640 kc.
\# = Guards all VHF frequencies station transmits.
(E) = Emergency use, as 121.5 (E).
** = Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.
* = Air Force guard 4495,4765,3117.5 kc and 121.5 mc.
(D) = Day. (N) = Night.
→ = New or revised data.

(A)=Air Force facility. GP=Glide Path. L7=Hi-intensity approach lgts. (W)=Without voice. (&)=On test basis, unmonitored and not to be used for navigation. MMK's, OMK's are at the same locations as the middle and outer markers unless otherwise specified. ➔=New or revised data. +=additional data will be found in Notices to Airmen section. *Continuous dots. (BC-8)=Lclzr back course non-standard and usable only to 8 mi. (BC-unusable)=Back course unusable.

(4-25-50)

AIR NAVIGATION RADIO AIDS

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly. NOTE: Only those courses cited in Notam section have been flight-checked and found usable for 50 miles unless otherwise cited. Other radials not approved for instrument use.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
↙ = New facilities or name changes, see page XIX
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . .Approach Control Tower, CAA
B. . . . .Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . .Control Tower, CAA
CA. . . .Control Tower, Air Force
CI . . . .Control Tower (City, County, Private, etc.)
CN. . . .Control Tower, Navy
D. . . . .Distantly controlled
FM. . . .VHF fan marker (100 watts)
GCA. . .Ground Controlled approach system
H. . . . .Non-directional radio beacon (homing), power 50 watts or more
ILS. . . .Instrument Landing System (voice on localizer channel)
IM. . . .VHF boundary marker
L. . . . .L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . .VHF fan marker, low powered (5 watts, not over 10 miles from range)
MH. . . .Non-directional radio beacon (homing) power less than 50 watts
ML. . . .Range (loop radiators), power less than 50 watts
MM. . . VHF middle marker
MMK. . Compass locator station when combined with middle marker of ILS
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . .VHF outer marker
OMK. . .Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P. . . . .Point-to-Point radio
RA. . . .Range (adcock, vertical radiators), power 150 watts or more
RL. . . .Range (loop radiators), power 150 watts or more
S. . . . .Simultaneous (range signals and voice) type of transmitter
T. . . . .Teletype
TX. . . .Principal teletype
V. . . . .Additional VHF voice feature on other than range frequency
VAR. . .Visual-aural VHF range
VOR. . .Visual omni-directional VHF range
W. . . . .Without voice facilities
Z. . . . .VHF station location marker at a range station

FREQUENCY LEGEND

V = 140.58 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc.
(1) = 3105,4495 kc guarded
(2) = 3105,4495,3117.5 kc, 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495,3117.5 kc; 122.1,126.7,140.58 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-3117.5,122.1 = guards every frequency in group (3) except 3117.5 and 122.1
(3),6210-3117.5 = guards 6210 plus every frequency in group (3) except 3117.5

NOTES

1. The new two-way international emergency frequency, 121.5 mc, has been commissioned at many towers and communication stations. All C.A.A. towers and communication stations will be using this frequency by approximately September 1, 1950.
2. All CAA Control towers stand continuous watch on 3117.5 kc, airline frequency. CAA INSACS, however, will discontinue watch on 3117.5 kc sometime after April 1, 1950. INSAC with associated tower does not guard 3117.5 kc except when tower inoperative.
3. Range courses are magnetic in-bearings.
4. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
5. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
6. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the channel or frequency on which the station reply is expected.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(A) AIRPORT NAME (WITH A IN TYPE COLUMN) - FIELD OWNED OR LEASED IN WHOLE BY U. S. AIR FORCE. AS SUCH, FIELD IS OPEN TO CIVIL ACFT ONLY BY PRIOR PERMISSION OF C. O. THEREOF.

NOTE: SIMILAR COMBINATIONS OF N, CG, AND NG INDICATE THE SAME IS APPLICABLE FOR NAVY, COAST GUARD, AND NATIONAL GUARD FIELDS, RESPECTIVELY.

(A) City and Airport Name (with C,I,M,MG, or P in Type column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and Air Force which permits use by transient military aircraft.

* City and Airport Name - C.A.A. Int. Field, open to mil acft. "*Airville, O, PIT-NEW," for example, indicates that the airport is Airville C.A.A. Intermediate Field, Site 0, on the Pittsburgh-New Orleans Airway. (Hypothetical site and airway). Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.

NOTES:

1. Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.
2. Military aircraft are permitted to use any field prefixed with an (A), (N), (CG), (NG), (P), or * .
3. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A", "N", "NG", or "CG" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.
4. When city and airport names are identical, the airport name is omitted in the interest of space-conservation.

TYPE

A	-U.S. Air Force	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
CG	-Coast Guard	MG	-Misc. Govt.	P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NO. OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Strip lights or portable runway lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Low intensity runway
5 - Low intensity instrument approach (neon)
6 - High intensity runway
7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis indicates only part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:
F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+:	115/145 oct.	C :	73/80 oct.
A :	100/130 oct.	J :	JP-1
B :	91/98 oct.		

REMARKS

(a) "CLOSED" indicates closed to all transient aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.

(b) "INACT-NO FACS." indicates USAF and/or Navy airfields which are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the Organization to which the aircraft is assigned.

(c) "CIVIL SVCG ONLY" indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.

(d) "STATUS UNKNOWN" indicates former Air Force and Navy fields are in the process of being disposed of by the Liquidation Service of General Services Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

(e) "ABANDONED" indicates reverted to non-airport usage, such as farming or grazing.

(f) "FEE" indicates landing charges for private or non-revenue producing aircraft. Very few airports charge landing fee for private aircraft. A number of fields, however, have parking fees for planes that remain over a couple of hours and and which buy no services. Most of the major airports such as airline terminals have landing fees for all revenue producing aircraft. Unfortunately, we cannot indicate these in the guide.

(g) "+" indicates additional data will be found in Notices to Airmen Section.

(h) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(i) "Rgt tfc N" indicates right turns should be made on landings and take-offs to the N.

(j) A,B-Air Force or Navy Fuel See Fuel Octane above.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least a 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORT NAME ABBREVIATIONS

AFB - U. S. Air Force
CGAS - Coast Guard Air Station
MCAS - Marine Corps Air Station
MCAAF - Marine Corps Aux Air Facility
NAAS - Naval Aux Air Station
NAF - Naval Air Facility
NAS - Naval Air Station
OLF - Outlying Field

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Fairfield-Suisun AFB, Calif., or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Tex.; Brookley AFB, Ala.; Washington National Airport, D.C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; MacDill AFB, Fla.; Washington National Airport, D.C.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Airport, D.C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

LISTING OF LOCATION OF PLAN 62 INTERPHONE FACILITIES: The location of each Plan 62 interphone connection to Flight Service is indicated in the Directory of Airports section of A.N 08-15-1. When closing or filing flight plans with Flight Service, pilots should check availability of interphone before placing long distance phone calls.

CHANGE IN VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy, and Coast Guard:

AIR FORCE*	NAVY	COAST GUARD	SERVICE
A...140.58	1-A...121.5	1...121.5	CAA Airways (Range Station)
B...126.18	2-B...142.74	2...142.74	Military Emergency
C...137.88	**3-C...132.3	3...132.3	Control Towers
D...121.5			Military Airways (a) USAF Alternate Control Towers
	Guard D...140.58		Two-way International Emergency Frequency
E...( )	4-E...( )	Guard D...140.58	CAA Airways (Range Station)
		4...118.1	Tactical or as required
F...( )	5-F...( )		International airdrome control towers
G...137.70		5...143.28	Tactical or as required
	6-G...( )	6...143.64	General Communications
H...134.1	7-H...142.02	7...142.02	GCA
	8...134.64	8...134.1	Tactical or as required
	9...126.18	9...126.18	GCA
U...108.3			Control Towers
V...108.7			ILS localizers and VAR ranges
W...109.1			"
X...109.5			"
Y...109.9			"
Z...110.3			"

(a) Available for service indicated on secondary basis.

* Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

** 137.88 authorized as interim frequency pending receipt of crystals. In 4-channel set-ups 126.18 and 142.02 mc may be substituted in accordance with operational requirements.

PORTABLE TRAFFIC CONTROL LIGHT SIGNALS: The attention of Air Force personnel is directed to CAA's Flight Information Manual, Volume 4, Number 1, dated August 1,1949, subject, "Portable Traffic Control Light Signals". Procedure listed is to be incorporated in "ANC Procedures for the Control of Air Traffic", and in the interim, Air Force personnel will comply with listed procedures.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see

pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat Such VAR facilities should be utilized for navigational aids and communication services, particularly when standard low frequency facilities are not available.

ADVISORY REGARDING GCA MINIMUMS DURING APPROACH: USAF Regulations require all USAF GCA final controllers to advise aircraft when they are passing through the published GCA minimum established for specific base. This advisory is intended for a sole purpose of re-emphasizing the pilot's responsibility with regard to field minimums.

APPROVAL OF INSTRUMENT APPROACH PROCEDURES FOR AIRPORTS LOCATED IN EXCESS OF SEVEN MILES FROM THE RANGE STATION: In accordance with minutes of Airspace Subcommittee Meeting No. 131, instrument approach procedures may now be approved for airports located in excess of seven miles from the associated radio facility, but such procedures will be governed by the following criteria:

a. From 7 to 10 miles, visibility not less than 2 miles and ceiling not less than 500'.
b. From 10 to 12 miles, visibility not less than 2 miles and ceiling not less than 700'
c. Twelve miles or over, operations shall be conducted in accordance with visual flight rules from radio range facility. Air Force procedures utilizing contact courses have recently been disapproved. If cancellation affects operation, new procedure should be submitted in accordance with AF Letter 55-6 and above criteria.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U.S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SENSE AS THOSE OUTLINED IN PARAGRAPH 37, AIR FORCE REGULATION 60-16, JULY 11, 1949".

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following are those which are now effective and distributed under AF Regulation 5-12. Base operations officers, weather and communication units, should check copies in use to insure that latest issues and all revisions are available. No manuals other than the following should be requested at this time under paragraph 5, AF Regulation 5-12.

GROUP I MATERIAL: II-B-2, Movement and Control Messages, July 1, 1948; II-B-3, Notices to Airmen, First Edition May 1, 1949 with one revision; Contractions, Fourth Edition, Dec.1, 1949; Location Identifiers, Third Edition, Sept. 15, 1948, with 17 supplements.

GROUP II MATERIAL: II-B-5, Airways Air-Ground Communications, Second Edition, Sept.1, 1948, with two revisions.

GROUP III MATERIAL: II-B-7, Landline Operating Procedures, April 15, 1945.

GROUP IV MATERIAL: Civil Airways Mileage Chart of July 27, 1949.

GROUP V MATERIAL: Service "A" Manual, Feb. 21, 1950 with four revisions; Service "C" Manual Jan. 24, 1950; Teletype Maps: M-10, Jan. 1, 1949; M-11, Dec. 1, 1949; M-13, June 15, 1948; and M-14, July 1, 1948.

GROUP VI MATERIAL: Teletype Maps: Drawing M-58, April 1, 1949; Drawing M-59, Jan. 5, 1949.

U.S. AIR FORCE CONTROL TOWERS AND RADIO RANGES DISCONTINUE GUARD ON 3105 KC: Effective March 1, 1950, USAF control towers and radio ranges have discontinued guarding 3105 kc. Only activities which will maintain guard on this frequency will be those requiring same due to presence of civil aircraft on the field, in the traffic pattern, or upon receipt of civil inbound flight plan.

CHANGES FOR TO 08-15-2: Add to page 10, following Broadcasting Station: Olathe NAS, Kansas. Call Letters: KPRS. Freq. 1590. Power watts: 500. Magnetic bearing and distance: 220°, 2.8 mi. Location from center of city: 1.1 SW. Lat. 38-52-03, long. 94-50-17. Height: 195'. Type: A. Hrs of oper: 0600-LS.

CORRECTIONS AND AMENDMENTS TO T.O. 08-15-3: (1) Correct Otis AFB, Mass., shuttle to: NW of Homer courses 320° and 140° minimum altitude 3000'.
(2) Correct page 148 by deleting procedure for Sinclair, Wyo. This field abandoned.
(3) Correct Glenview NAS, Ill., by deleting following note: After Glenview letdown, proceed contact to Orchard Place, only after instructions and clearance from Glenview tower as contact course was cancelled some time ago.
(4) Change bearing and distance at the following locations: Page 15 Baker, Oregon - 111°,1.8. Page 120 Pembina, N. Dak. - 356°, 1.6. Page 81 - Kansas City (Mun), Mo. - 142°, 2.9. Page 82 - Kansas City (Fairfax Fld), Mo. - 148°, 0.8. Page 83 - Kelly (San Antonio) (Kelly AFB), Texas - 107°, 2.0. Page 66 - Garden City, Kans. - 132°, 7.5.
(5) Correct listing under Forbes AFB, Kansas by deleting instrument approach procedure inasmuch as range has been decommissioned.
(6) Add instrument approach procedure for Brooks AFB, Texas. This procedure has been approved for this base, utilizing the Kelly radio rng, ident: SKF, freq. 254 kc. Initial apch altitudes: NE- 2500 (Int SW crs Austin). SE - 2000 (Int SW crs San Antonio). SW - 2000 (Laredo rng stn). NW - 3500 (Int S crs San Angelo). Minimum altitudes: NE-2200 (Int W crs San Antonio). NW- 2500 (Medina FM). Final apch crs: NW. Procedure turn: W side NW crs at minimum altitudes for 10 mi: 2500; for 15 mi: 2600; for 20 or 25 mi: 3000. Low cone: 1640. Bearing and distance, stn to fld: 97°, 11.7 mi. Minimum altitude over arpt: 1300. Missed apch procedure: Proceed out on a heading of 180° to intersect SE crs of SKF, climbing to 2000'.
(7)Correct listing under Ft. Worth, Texas (Carswell AFB) by changing missed apch procedure to read: Turn to a heading of 214°, climb to 2000, and contact Ft. Worth Apch Ctl for further instructions.
(8) Correct listing under Kelly AFB, Texas by changing minimum altitude over field to read: 1400'.
(9) Add instrument apch procedure for Joint Long Range Proving Ground, Cocoa, Fla. This procedure has been approved, utilizing Melbourne range, ident: MLB, freq. 257 kc. Initial apch altitudes: E - minimum enroute altitude. S - 1200 (Int N crs PBI). W - minimum enroute altitude. N - 1200 (Int NE crs ORL). Shuttle: S crs between rng stn and a point 2 minutes out. Final apch crs: S. Proceduro turn: E side S crs within 25 mi at minimum altitude 1200. Low cone: 800'. Bear. and distance, stn to fld: 20°, 8 mi. Minimum altitude over arpt: 509'. Missed apch procedure: Proceed out N crs climbing to 1200'.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D.C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C.

All Naval Air Stations and Air Facilities are directed to notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

(4-25-50)

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U.S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

MANDATORY GUARD ON 3105 KC DISCONTINUED: Mandatory guard on 3105 kc at Naval and Marine Air-ground communications installations are being discontinued.

CIVIL SPECIAL NOTICES

CAA AIRWAY COMMUNICATIONS STATIONS GUARDING 126.7 MC: Receiving watch on 3117.5 kc, airline frequency, will be discontinued by all CAA airway communications stations shortly after July 1, 1950. All CAA airway communications stations stand a continuous receiving watch on 126.7 mc, airline enroute frequency.

DOES YOUR RADIO EQUIPMENT PERMIT YOU TO COMPLY WITH CLEARANCE? Air traffic ctl clearances include data on radio fixes to properly identify them such as "Denver VAR Range", "Flatbush Compass Locator", etc. It is the responsibility of a pilot to immediately notify air traffic control if his radio equipment cannot receive the type of signals he must utilize to comply with his clearance.

ON REQUEST REPORTING POINTS: The following on-request Reporting Points will be established on the dates specified below: May 17, 1950, WOODFORD - The intxn of the SW crs of Washington, D. C., and the N crs. of Richmond, Va. May 20, 1950, BELLEMEAD - The intxn of the E crs of Allentown, Pa. and the NE crs of Willow Grove, Pa.

DANGER AREA DESIGNATIONS: The following Danger Area amendments will be in effect as dated, unless otherwise advised: See last item on Page

AMENDMENT NO. 34 (May 4, 1950)

(1) The Humulla, Island of Hawaii, Territory of Hawaii, area is amended by changing the "Time of Designation" colum to read: "Periodically, during hours of daylight, as indicated in Notices to Airmen."

(2) A Maili Point, Island of Oahu, Territory of Hawaii, area is added to read: Location: Maili Point, Island of Oahu (Hawaiian Islands Chart); Description: A circular area having a radius of 1-1/2 miles, centered at lat. 21-24-00N, long. 158-11-50W; Altitudes: Surface to 5000'; Time: Continuous; Using Agency: Fleet Air Hawaii, NAS, Barber's Point, T.H.

(3) A Makua, Island of Oahu, Territory of Hawaii, area is added to read: Location: Makua, Island of Oahu (Hawaiian Islands Chart); Description: Beginning at lat 21-35-30N, long. 158-11-30W; SSE to lat 21-31-00N, long. 158-10-00W; WSW to lat 21-30-30N, long. 158-12-30W; WNW to lat 21-31-00N, long. 158-14-00W; NNW to lat 21-32-30N, long. 158-14-30W; NW to lat 21-33-30N, long. 158-15-30W; NW to lat 21-34-45N, long. 158-17-20W; ENE to lat 21-35-15N, long. 158-14-30W; easterly to lat 21-35-30N, long. 158-11-30W, point of beginning, excluding those portions over lapping the Mokuleia Danger Area and the Kaena Point Caution Area; Altitudes: Surface to 22,000'; Time: Daylgt and darkness, as indicated in Notices to Airmen; Using Agency: Army Ground Forces, Pacific.

AMENDMENT NO. 35 (May 2, 1950)

(1) The Chocolate Mountains, California, area is amended by changing the "Time of Designation" column to read: "0600 to 1300, Monday thru Thursday of each week".

(2) The Banana River, Florida, area is amended by changing the "Using Agency" column to read: "6th Naval District, Charleston, South Carolina, and Joint Long Range Proving Ground, Cocoa, Florida".

(3) The Ft. Benning, Ga, area is amended by changing the "Designated Altitudes" column to read: "Surface to 40,000'."

(4) The Ft. Jackson, South Carolina, area is amended by changing the "Designated Altitudes" column to read: "Surface to 40,000', and by changing the "Time of Designation" column to read: "Continuous".

CORRECTIONS AND AMENDMENTS FOR FLIGHT INFORMATION MANUAL: Correct Vol 4, No. 2, dated Feb. 1, 1950, as follows: (a) Page 113, under Navy VHF/DF Stations, add "Olathe NAS, Kans. in emergency only.

(b) Page 122, under Kansas opposite Olathe KPRS add, "1.1 SW. Lat 38-52-03, long. 94-50-17 under tower lctn. Under tower data insert 1225'; in elev. column: 195' in height column and A in type column.

(c) Correct page 3 so that the paragraph headed FAN MARKERS reads as follows: "....For identification purposes, they emit coded dashes. The fan marker lying on a true north course or first course east of true north transmits one dash. The second course....".

(d) Page 36, add Winnemucca, Nevada CAA telephone number 212; Weather Bureau telephone number 203.

(e) Page 85, under Winnemucca, Nev. Arpt, change the latitude to 40-53-45.

(f) Instrument Approach Procedure Revisions: (1) Temporary revision due to "Swarmer" operations, effective April 22 thru May 7, 1950: Spartanburg, S. Car: Procedure turn min alt shall be 2000' and made on the N side of the SW crs within 6 mi.

(2) Amend Low Frequency Range Procedures as follows: (a) Page 215, under Mt. Shasta, Calif: DELETE all reference to this range as it has been decommissioned.

(b) Page 234, under Trinidad, Colo: Correct straight-in minimums to: 600' - 1.5 day, NA at night.

(c) Page 236, under Washington, D. C., Anacostia NAS: Change mag bearing, stn to arpt to : 12°.

(d) Page 237, under Wichita, Kans: Change bearing and distance stn to arpt to: 167°, 1.2 mi.

(3) Amend Automatic Direction Finding Procedures as follows: (a) Page 249, under Mansfield, Ohio: (1) Make following changes in Initial Approach to Stn column: Distance from Dayton rng to MH - 112.0; distance from Elyria FM to MH - 47.0, min alt - 2600; distance from Int. NE crs Columbus & 310° track to MH - 4.0; change last initial approach as follows: From: Int. SW crs Akron & 285° bearing on MH, To: MH, Mag. Crs: 285°, Dist: 36.0, Min Alt: 2500. (2) Add asterisks after regular and straight-in visibility minimums. (3) Add note to remarks column: *700-1 for acft with stall speeds of 75 mph or less.

(b) Page 249, under Merced, Calif: PROCEDURE CANCELLED.

(4) Amend Instrument Landing System Procedures as follows: (a) Page 256, under Cheyenne, Wyo: Delete transition to ILS from Meadows FM (This FM has been decommissioned).

(b) Page 257, under Chicago, Ill., O'Hare-International Arpt: (1) Change min alt at glide path interception to: 1900. (2) Change glide path alt over outer marker to: 1820; over middle marker to: 875. (3) Add * before the regular ceiling minimum. (4) Add note to remarks column: * All acft at night.

(c) Page 259, under Fargo, N. Dak: Change transition to ILS from Barnesville FM as follows: From: Barnesville FM; To: S crs ILS; Mag crs: 290°; Dist: 21.0; Min alt: 2300.

(d) Page 263, under Milwaukee, Wisc: (1) In transition to ILS column, change distance from Milwaukee rng to the outer marker to: 2.5. (2) Change glide path alt over markers to: outer - 2010, middle - 925. (3) Add * before the regular ceiling minimum. (4) Add note to remarks column: * All acft at night.

(e) Page 266, under Rock Springs, Wyo: (1) Delete: (within 10 mi) in Procedure turn min column. (2) Add note to remarks column: Regular minimums are 500-1 day, 500-2 night for acft with stall speeds of 75 mph or less.

(f) Page 266, under Salt Lake City, Utah, Procedure No. 1: Change remarks column to: Climb to cross Salt Lake City rng at 6500', then climb to 11,000' on W crs of Salt Lake City. *Rnwy No. 34. Procedure No. 2: Change pull-up to read: Climb to cross Salt Lake City rng at 6500', then climb to 11,000' on W crs of Salt Lake City.

AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: (1) Correct RF chart 47 by changing bearing from Columbus VOR to airport to: 262°.

(2) Add to San Diego Local Aeronautical Chart an artificial lake at lat 32-47 and long. 116-47. The lake is boomerang-shaped with large horse shoe-shaped dam at southerly end. It is about 1.5 mi long in a NE/SW direction.

(3) Because La Guardia ADF holding patterns were discontinued March 20, 1950, and coded ATC clearances no longer being used, destroy RF chart size colored "Holding Pattern for La Guardia Arpt, New York" and "CAA coded Departure Routes for La Guardia and Newark Arpts.

(4) Correct RF 53 by adding guard on 121.5 mc to Marfa, Texas.

WEATHER REPORTING SERVICE

Weather Reporting Location	Lat., Long.	Elev.	
Concordia, Kansas	39°35', 97°41'	1375	SW reports to be available soon
Concord, California			SW reports no longer available

NOTE: Lexington, Nebraska SW reports replaced by hourly reports.

ADDITIONAL DANGER AREA DESIGNATION: AMENDMENT 36 (May 1, 1950) The Lake Ontario (Wilson), New York, area is amended by changing the "Time of Designation" column to read: "Daylgt hrs only, from May 1 to Sept. 1, 1950".

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
★ - New or revised radio data to be inscribed on charts or added to records.

NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: ANNISTON-RADIO: Omnirng radials 275°,290°,260°,105°,90°,75° flgt-checked usable. (3-20)
ANNISTON ARPT: Ctn, strip extensions in progress. Equip on fld. (3-3)
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy, two high intensity rnwy lgts are lctd in center of black top rnwy. (11-23) No Navy acft svcg avail from lcl sunset to 0800 CST. (12-15) Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (3-31)
BROOKLEY AFB (MOBILE)-TOWER: USAF GCA flgt-checked and found unsatisfactory. Use for trng. (4-8) FLD: For clearance of foreign flgts, documentary proof of diplomatic clearance for all countries on itinerary having such requirements is necessary. All requirements listed in Foreign Clearance Infor. Guide will be complied with. (4-12)
CRAIG AFB (SELMA): Ext inst trng on Craig rng 0800-1700 during IFR conditions. (2-6)
DOTHAN ARPT: Rnwy lgts avail on Rnwy 16-34 only. (4-16)
EVERGREEN-RADIO: Omnirng radials 35°,50°,20°,220°,235°,205° flgt-checked, usable. (3-20)
EVERGREEN-MIDDLETON ARPT: Vehicular tfc on fld intermittently at all hrs. Rnwys, taxi strips being used as access road to adj lnd. Use extreme ctn. (3-24)
HUNTSVILLE-RADIO: Omnirng radials 190°,205°,175°,360°,15°,345° flgt-checked, usable. (3-20)
LANETT-VALLEY ARPT: NE/SW Strip clsd (const). (3-20)
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (1-17)
MOBILE-RADIO: Omnirng radials 50°,65°,35°,230°,215°,245° flgt-checked, usable. (3-20)
MONTGOMERY-RADIO: Omnirng radials 10°,25°,355°,50°,65°,35°,120°,135°,105°,220°, 205°,235°,320°,335°,305° flgt-checked, usable. (3-20)
MUSCLE SHOALS-RADIO: Ctn advised on VHF omnirng thru northern sector within 20° E and W mag. north where severe course indicator roughness is present. (1-20)
TUSCALOOSA-RADIO: Omnirng radials 40°,55°,25°,240°,255°,225° flgt-checked, usable. (3-20)
